Growth Right Solutions

2026-2027 School Year

FOR ARKANSAS BOARDS OF EDUCATION

Your board's AI year at a glance.

This calendar follows the district year that Arkansas law sets for every district, July 1 through June 30, with students in school from late August to late May. It shows the few times AI comes before your board and what your superintendent brings each time.

☐ Training ☐ Board review ☐ Budget ☐ Annual AI Report

July
Summer training prepares teachers and staff before students return.

August
Staff begin the year trained on the district's AI policy, and families receive a short note about how the district uses AI.

September
The board approves the budget, including AI training and support, before the September 30 filing deadline.

October
The superintendent gives the board a short fall update on training and approved tools.

November
Training continues building by building, and staff share what is giving them time back.

December
Board members finish their required annual training hours by December 31.

January
The board reviews its AI policy and asks whether any update is needed.

February
The superintendent reviews which AI tools are working and which ones to retire.

March
Budget planning for next year includes training for new staff and ongoing support.

April
Staff complete a short survey on time saved, which feeds the annual report.

May
The board receives the Annual AI Report and sees the results of the year.

June
The district plans next year's training from what the report shows.

Your board sees AI on its agenda a few times each year, and never as a surprise. **Growth Right Solutions supports the training, the updates and the Annual AI Report** throughout the year, so your superintendent always has what the board needs.
