Tonsley, SA

INDUSTRIAL

$6.2 MILLION

4,900M² GLA

12

THE BRIEF

Purpose-built headquarters including a two-storey office, amenities, manufacturing warehouse and associated carparking for Oilpath Hydraulics

DESCRIPTION

Oilpath Hydraulics's new headquarters was delivered through a 12-month design and construct program, and its standout features make it a striking addition to the Tonsley Innovation District.

The $6.2M project features a 2,650 m² building area and 2,287 m² of paved space. Designed with a striking architectural façade and terrace, the office showcases high-spec finishes throughout.

The facility includes full integration services to Oilpath's specialist machinery. The warehouse includes fire-rated compartmentation to meet the required FRLS, alongside burnished concrete floors to machine stop.

It was a pleasure working with the Oilpath Hydraulics team to design and construct this outstanding facility to support their operations.
