Best Device on the marketplace

• 13 solid titanium plates coated with 99.99% platinum • Can be installed above or below the sink
• Dual filtration system inside the unit (Filter 1: 0.5-micron microfiltration — Filter 2: 0.1-micron ultrafiltration)
• Filter replacement within 12 months, based on the volume of water dispensed
• Large display showing: ORP, pH, and volume dispensed for Filter 1 and Filter 2
• Designed for quick and easy filter replacement
• Device cleaning cycle every 2–3 months
• High-performance device capable of reaching a pH range of 3.14 to 10.91 without saline solution
• Includes a filter for use with saline solution to achieve a pH range of 2.5 to 11.5
• Achieves a high ORP (-825) without saline solution

**Please note that the pH values (both acidic and alkaline) stated in this documentation may vary slightly depending on the salt concentration of the input water.*

Advantages during daily life

- ## Absolute comfort

  You have access to multiple types of water directly from your tap, without having to buy bottles or other products.

- ## Significant savings

  Lower recurring expenses for water, detergents, and household solutions.

- ## More time for yourself

  Forget tedious supermarket lines or heavy packages to carry.

union life

Benefits during daily life

- ## An eco-sustainable choice

  Drastically reduce your plastic consumption, respecting the environment and contributing to the preservation of the planet.

- ## Smart technology

  The system is equipped with automatic self-cleaning and drainage to maintain optimal efficiency at all times.

union life

Certifications

European compliance regarding electrical safety, electromagnetic compatibility, and materials. Required for sale in the EU.

Mandatory conformity mark for the countries of the Eurasian Economic Union (Russia, Kazakhstan, etc.).

US electromagnetic compatibility certification. Required for the US market.

Certifications issued by an independent third-party body regarding material quality and regulatory compliance.

ISO 14001:2015

Environmental management system: certifies the company's commitment to sustainability.

ISO 9001:2015

Corporate quality management system: ensures control and traceability of production processes.

KFDA
KOREA FOOD & DRUG ADMINISTRATION

Medical device certification in South Korea, issued by the Ministry of Health (MFDS).

Korean national technical test on electrical safety and performance.

NARODOWY INSTYTUT ZDROWIA PUBLICZNEGO · PIB · PRODUKT Z ATESTEM

Polish sanitary certification; guarantees the safety of materials in contact with water.

BPA FREE

Absence of Bisphenol A in plastic parts in contact with water—crucial for hormonal health.
