The coordination problem

Public workforce programs frequently involve multiple organizations with different systems, responsibilities and reporting needs. The operational challenge is not only participant intake. It is maintaining visibility as people move through eligibility, readiness, training, experience, employer matching and placement.

Program ecosystem

Program actor	Role in the workforce lifecycle
Agency / workforce organization	Mission, eligibility, funding, oversight and outcomes
University / training provider	Education, training, research and participant development
Employer	Demand, work-based learning, interviews and hiring
Participant	Profile, readiness, training, experience and placement
Dakdan	Operational connection across the lifecycle

Modernization model

Program lifecycle

INTAKE -> ELIGIBILITY -> READINESS -> TRAINING -> EXPERIENCE -> EMPLOYER MATCH -> PLACEMENT -> OUTCOME TRACKING

Where Dakdan can fit

- Participant profile and status progression.
- Career readiness and training milestones.
- University and provider coordination.
- Internship and apprenticeship pathways.
- Veteran and military career-transition programs.
- Employer demand and placement workflows.
- Operational visibility into handoffs and outcomes.

Research and innovation pathways

Some public-sector missions also intersect with research, technology transfer and commercialization. SBIR and STTR can create pathways for eligible small businesses and research institutions when the solicitation, ownership, workshare and other program requirements are satisfied.

Procurement and pilot approach

A practical government conversation begins with the mission and desired outcome, not with a generic software deployment. The initial scope can be one population, one workforce program, one region or one pilot involving a defined set of partners.

Pilot question	Example
Population	Veterans, students, apprentices, displaced workers
Partners	Agency, university, training provider, employers
Outcome	Readiness, credential, internship, apprenticeship, placement
Visibility	Status, milestones, partner handoffs, completion
Expansion	Additional populations, employers, regions or programs

Next step

Dakdan is designed to move the reader from understanding to action. Choose the path that matches your role and current level of readiness.

Action	Destination
