Called Location Hit % means hitting the called target, not base hits allowed. Hit / Competitive / Miss use recorded command grades; ungraded pitches are excluded. **Quality Pitch %** = Hit + Competitive, using the same graded-pitch denominator; it does not mean Strike %. **Strike % (location)** counts actual pitch points inside or on the boundary of the strike-zone grid. 40 located pitches; 0 missing locations excluded. Competitive tolerance does not change this zone.

What Needs Improvement

Fastball: Called Location Hit 50% (9/18), Competitive 39% (7/18), Miss 11% (2/18). This is the highest miss rate among the selected pitch types. 0 of 2 misses finished below the called target. This is a location pattern to review, not a diagnosis of delivery mechanics.

Selected data only. Percentages pool pitch counts. Small samples describe observations; they do not establish a trend or diagnose fatigue.
