SAGLE

APEX STEEL

Direk, SA

INDUSTRIAL

$20 MILLION

22,407M² GLA

14 MONTHS

THE BRIEF

Warehouse, office and high density pavements.

DESCRIPTION

Design and constructed in collaboration with Samaras Developments to provide a new manufacturing and storage space for Apex Steel.

2 x 2 story office buildings for operations and administration were integral to the operational control of the business through delivery of roll forming and structural steel products.

A major achievement for the project team was the delivery of over $4mil of additional scope within the contract PC timeframe. Furthermore, PC was delivered 3 months early.
