MOSQUITO MANAGEMENT IS A TEAM EFFORT

Taking these simple steps
can help reduce your mosquitoes:

- ☐ Regularly mow your grass & trim shrubbery
- ☐ Irrigate your lawn to avoid standing water accumulation
- ☐ Clean your gutters
- ☐ Avoid overwatering plants
- ☐ Eliminate weeds or trash in ditches & drains
- ☐ Fill-in tree holes, hollow stumps, or shallow areas in the yard
- ☐ Use fans outside to deter pests
- ☐ Check window & door screens for breaches
- ☐ Check to ensure spigots are not leaking into puddles
- ☐ Frequently empty bird baths and other water-collecting receptacles
- ☐ Cover trash cans to prevent water accumulation
- ☐ Properly maintain any pools or ornamental ponds
- ☐ Encourage your neighbors to apply all of these steps! (Very important!)
