WHAT IF YOU DIDN'T NEED MULTIPLE SYSTEMS?

Multiple technologies. Three stages. One purpose.

AVANTI +Scale Armor

2.5 X 20"

Big Performance. Smaller Footprint.

Premium whole-home filtration designed to deliver cleaner water throughout your home in a compact, space-saving design.

Better Water. Every Tap. Every Day.

ENGINEERED FOR TODAY'S WATER

No single filtration technology can address every water challenge. By combining **multiple filtration mechanisms** into a **staged system,** the **AVANTI** is designed to deliver **broader contaminant reduction** and **more consistent performance** across changing water conditions.

THE POWER OF A THREE-STAGE SYSTEM

LAYERED PROTECTION

Different media and **technologies work in sequence** to address a **wide range of water quality concerns.**

INCREASED CONTACT TIME

More media and **more stages** create a **longer filtration pathway**- essential for **deeper adsorption** and **finer particle capture.**

BUILT-IN REDUNDANCY

Each stage is designed to **support the next,** providing **layered protection** and **consistent performance.**

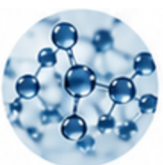

BROAD-SPECTRUM FILTRATION SUPPORT

PHYSICAL CONCERNS

- Sediment
- Rust
- Sand
- Debris

CHLORINE & BYPRODUCTS

- Chlorine
- Chloramines
- THMs
- HAAs

CHEMICAL CONCERNS

- VOCs
- PFAS-related compounds
- Organic compounds

WATER QUALITY CONCERNS

- Trace metals
- Scale-forming minerals
- Taste & odor

BETTER TASTE & ODOR

Reduces chlorine, chemicals, and unwanted odors for **cleaner, better-tasting water.**

CLEANER FEELING SHOWERS

Helps reduce exposure to chlorine and chemicals for **healthier-feeling skin and hair.**

HELPS PROTECT PLUMBING & APPLIANCES

Helps minimize scale and buildup that can impact the **life of plumbing and water-using appliances.**

BETTER WATER AT EVERY TAP

Filtered water at **every tap**- for drinking, cooking, bathing, cleaning and everything in between.

NO SALT NO ELECTRICITY NO WASTEWATER

No salt. No electricity. No wastewater.
Better for your home and better for the planet.

TRUSTED COMPONENTS. PROVEN SOURCES.

The AVANTI Signature Edition is built using carefully selected components and media sourced from established manufacturers throughout the water treatment industry.

Many of these individual components have been independently tested, evaluated or certified by their manufacturers for material safety, performance and other applicable industry standards where specified.

Referenced testing, certifications, and performance data apply to individual components where noted.

THE AVANTI DIFFERENCE

No Salt. No Electricity. No Wastewater.

Three Stages.
Multiple Technologies.
One System.

AVANTI +ScaleArmor

HOW AVANTI WORKS

A THREE-STAGE SYSTEM. PURPOSEFUL DESIGN. LAYERED SUPPORT.

Engineered with **advanced technologies** and **independently tested components** to deliver **broad-spectrum support** across changing water conditions—helping **protect your home, your water and your peace of mind.**

Designed to support **cleaner water** for drinking, cooking, bathing, appliances and everyday living.

LAYERED FILTRATION

INCREASED CONTACT TIME

BUILT-IN REDUNDANCY

STAGE 1 — NanoCarbon+
Advanced Particle & Microbiological Support

Helps capture **sediment, rust, fine particles** and **biological material** before water moves downstream.

TECHNOLOGY HIGHLIGHTS

- **Electropositive NanoFiber Technology** with **nano-alumina** filtration
- **Pleated design** with significantly **increased surface area**
- **Agion® antimicrobial** component integrated within media
- **High dirt-holding capacity** for sustained performance
- Supports **high flow rates** and **extended media capacity.**

REFERENCED MEDIA PERFORMANCE HIGHLIGHTS*

- **>99.99%** efficiency at **0.2 microns** (latex sphere testing)
- **>3 LRV**** cyst retention support
- **>5 LRV**** Klebsiella terrigena retention support
- **>99.95%** endotoxin reduction support

**Performance highlights based on independent testing of referenced media under specified laboratory conditions.*

***LRV = Log Reduction Value. 3 LRV = 99.9% reduction; 5 LRV = 99.999% reduction.*

WATER QUALITY CATEGORIES SUPPORTED

- Sediment
- Rust & Corrosion
- Particulate Matter
- Biological Material
- Cysts
- Endotoxin Support

ALSO SUPPORTS THROUGH REDUNDANCY

- **VOC-related compounds**
- **Chlorine & chloramine interaction**
- Taste & odor improvement
- Trace contaminant support

STAGE 2 — ScaleArmor Carbon+
Advanced Chemical Reduction & Scale Protection

Supports water quality throughout your home.

TECHNOLOGY HIGHLIGHTS

- **Dual-Media Design:** outer filtration layer + center-core carbon block with **ScaleArmor™ media**
- **High-Performance Carbon Block Filtration** (5-Micron)
- **ScaleArmor™ scale inhibition** and conditioning technology
- Dual-action filtration & conditioning in a single stage
- **Salt-free design—**no salt, no electricity, no wastewater

WATER QUALITY CATEGORIES SUPPORTED

- Hardness Minerals (Ca^{2+}, Mg^{2+})
- **Chlorine** & **Chloramines**
- **THMs** (Trihalomethanes)
- **HAAs** (Haloacetic Acids)
- **PFAS-Related Compound Support**
- Taste & Odor Improvement
- Plumbing & Appliance Protection

KEY BENEFITS

- Helps **reduce scale buildup** in pipes, fixtures and appliances
- Helps reduce **chemical contaminants** that affect performance and taste
- Supports **balanced water chemistry**
- **Salt-free,** maintenance-friendly solution

STAGE 3 — Catalytic Carbon
Finishing & Final Polishing

Delivers the final polish for exceptional taste, odor reduction and improved water clarity.

TECHNOLOGY HIGHLIGHTS

- **5-Micron carbon block**
- **Enhanced contact time** for deeper reduction
- **Final polishing stage** for exceptional taste & clarity
- **Completes the multi-stage process**

WATER QUALITY CATEGORIES SUPPORTED

- Chloramines & Chlorine
- VOCs (Volatile Organic Compounds)
- Organic Compounds
- Taste & Odor Refinement
- Final Particulate Reduction
- Final Water Quality Finishing

KEY BENEFITS

- Final polishing for **superior taste**
- Helps reduce **remaining chlorine, chloramines, and VOCs**
- Provides a refined "finishing pass" for crystal-clear, great-tasting water
- Completes **layered AVANTI protection**

FILTER LIFE & MAINTENANCE

Recommended filter replacement is typically every **12-18 months,** depending on **household size, water usage, source water quality** and **operating conditions.** For best performance, filters should be inspected and replaced as needed.

THE AVANTI DIFFERENCE

No Salt. No Electricity. No Wastewater.
Three Stages. Multiple Technologies.
ONE PURPOSE.

PURE HOME 365
