

# GRASSMAX™

IT'S ALL ABOUT A PERFECT CUT!

The only blade system in the world manufactured to meet the precise design tolerances incorporated into every Grasshopper DuraMax® deck. The cutting edge of GrassMax™ MARBAIN® blades are proven to last longer compared to aftermarket blades claiming to be exact replacements. GrassMax™ blades are through-hardened to hold their edge longer for a better-quality cut, minimal grass buildup and optimum airflow for side or rear discharge thanks to a patented heattreating process that makes them 25 to 40% harder and last twice as long in field tests than aftermarket options. If cut quality and long wear are important, make sure the Grasshopper logo is stamped onto the blade.

## LOOK FOR THE LOGO

on the grass side of the blade to be sure you're using GrassMax™ blades.

| <p>Recommended for most normal side-discharging applications, from the moist grass conditions of early spring to final mowing in the fall. Available with optional LaserEdge® EverSharp™ technology that requires no sharpening for the life of the blade.</p> <p><i>Not recommended for mulching or vacuum applications. Consider Medium Lift or Contour blades in dry, sandy soils.</i></p> <p>In dry, dusty conditions, ensure that deck is leveled properly and consider using air dams to minimize dust blow-out from around deck.</p> | <p>Recommended for side-discharge applications in very lush or overgrown conditions. They are recommended for use with liquid-cooled models or air-cooled models greater than 23 hp.</p> <p><i>Not recommended for mulching or vacuum applications and should never be used in dusty, sandy conditions.</i></p> | <p>Recommended for use with all PowerVac® Collection Systems. Medium Lift blades are required with certain mulching packages – use Medium Lift blades with any mulching package that originally included Medium Lift blades. Also recommended for most rear discharge decks.</p> <p><i>Also satisfactory for many side-discharge applications, including dry, sandy conditions.</i></p> | <p>The blade of choice for the highest quality cut in side-discharge mode in ideal conditions where the 1/3 rule is followed. They are also preferred when mowing over dry, sandy soils. In high-profile areas that are mowed on a regular basis, Contour blades will leave the most manicured cut.</p> <p><i>Not recommended in lush, moist, high-volume conditions.</i></p> | <p>Designed for use with all mulching packages beginning with SN 5700000 and above. In conjunction with the Down Discharge™ mulching baffles, High-Low Mulching blades recut clippings multiple times thanks to an extended cutting edge and a carefully crafted rise and fall airflow pattern that helps clippings disappear into the turf canopy.</p> <p><i>Use Medium Lift blades if they were provided with your original package.</i></p> | <p>Looking for a toothy-edged blade to break apart leaves or clippings in drier conditions? The Shredder™ Blade was designed for this purpose. Used with Grasshopper 52-, 61- and 72-inch DuraMax® decks, Shredder™ blades are the best choice when serrated-wing blades are desired to reduce volume of leaves and clippings.</p> <p><i>Not for Down Discharge™ mulching but can reduce leaf and clipping volume in drier conditions.</i></p> |                                |                                |                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |        |                                                                                                                                                                                  |                 |                 |                 |                 |                                                                                                                                                                                  |                 |                 |                 |                 |                                                                                                                                                                                  |                 |                 |                 |                 |                                                                                                                                                                                  |                 |                 |                 |                 |                                                                                                                                                 |                 |                 |                 |
