

## NORTHBRIDGE REVIEW SYSTEMS

# THE NORTHBRIDGE PARTNERSHIP ROADMAP

*Your Guided Path to Reputation Authority & Automated Growth*

This document outlines the strategic framework, data, and tools that power the Northbridge Review Systems platform — and explains exactly how they will work for your business.

---

## About Northbridge Review Systems

---

Northbridge Review Systems was founded in 2026 specifically to address the "Trust Decay" problem created by Google's evolving local prominence algorithm and the FTC's new Consumer Review Rule (effective October 21, 2024). We are a Las Vegas-based reputation management company — not a faceless software subscription. We build, launch, and fully manage your reputation system.

**Support:** [solutions@northbridgereviewsystems.com](mailto:solutions@northbridgereviewsystems.com) — 24-hour response guarantee

**Phone:** 707.517.3089

**Portal:** [northbridgereviewsystems.com](http://northbridgereviewsystems.com)

**Location:** 304 S. Jones Blvd #1257, Las Vegas, NV 89107

**Agreement:** Month-to-month — cancel anytime with 30 days written notice

---

### SECTION 1: THE PROBLEM — THE "SILENT KILLER" OF LOCAL BUSINESS

In 2026, a stagnant Google Business Profile is a revenue leak. While you focus on daily operations, Market Invisibility is quietly diverting your potential customers to competitors with stronger review momentum.

Northbridge plugs this leak by turning your existing customer relationships into an automated, always-on reputation engine.

---

### SECTION 2: THE "TRUST DECAY" RULE — CONSUMER PSYCHOLOGY

The digital landscape has shifted. **BrightLocal data shows that 93% of consumers check online reviews before visiting a local business — which means your Google profile is now your true first impression, not your storefront.** According to BrightLocal's 2026 Local Consumer Review Survey (published February 13, 2026), recency is now the critical factor in how those customers evaluate your business:

<b>74%</b>	Only value reviews from the last 3 months
<b>32%</b>	Specifically seek reviews from the last 2 weeks
<b>18%</b>	Only act on reviews from the last week

#### **The Risk**

If your reputation is not generating fresh feedback on a consistent basis, you are losing the trust of nearly three-quarters of your market. To the modern customer, old reviews are historical data — not a reflection of your current service.

 Source: BrightLocal Local Consumer Review Survey 2026

### SECTION 3: THE GOOGLE RANKING ALGORITHM — THE FACTS

Google officially confirms that local search results are based on three primary factors: Relevance, Distance, and Prominence. Northbridge focuses on Prominence — the metric Google uses to measure how well-known and trusted a business is.

#### **Google Official**

"More reviews and positive ratings can improve your business's local ranking."

- Review signals now represent approximately 20% of local Map Pack ranking factors.
- Responding to reviews signals to Google that your business is active, authoritative, and trusted.
- Google's updated Prominence documentation now centers on review volume and inbound links — making reviews one of the two primary levers for local visibility.

 Source: Google Business Profile Help: How to improve your local ranking

 Source: Google Business Profile Help: Respond to customer reviews

### SECTION 4: THE RESPONSE REQUIREMENT — WHY ENGAGEMENT MATTERS

Responding to reviews is not optional — it is an active trust signal to both Google and your future customers.

- 88% of consumers are more likely to choose a business that responds to all of its reviews, positive and negative. (BrightLocal, 2026)

- 89% of consumers in 2026 now expect business owners to respond to reviews. (BrightLocal, 2026)
- 35% more revenue is earned by businesses that respond to at least 25% of their reviews vs. those that respond to none. (Womply, via Buffer)

### The AI Executive Edge

Our AI Executive tier addresses the response challenge at scale. Every review — positive or critical — receives a unique, SEO-optimized reply within 5 minutes, 24 hours a day. No business owner should have to manually respond to every review in order to compete.

**Capacity & Scaling:** Your AI Executive architecture includes a standard monthly labor allotment of 1,000 AI-generated replies. This provides the capacity to manage approximately 333 to 1,000 unique customer interactions with 24/7/365 autonomy. If volume exceeds this, the system automatically scales with \$100 replenishment blocks.

 Source: BrightLocal Local Consumer Review Survey 2026

 Source: Womply revenue study via Buffer

**To remain 100% compliant with FTC and Google transparency rules, a clear and direct link to post a public review remains visible and accessible to every customer throughout this entire process, regardless of their initial sentiment.**

---

## SECTION 5: MANAGED REPUTATION INFRASTRUCTURE & FTC COMPLIANCE

We facilitate growth that is safe, sustainable, and fully compliant. Google has strict policies against "Review Gating" — the practice of discouraging negative reviews or selectively soliciting only positive ones.

### The Northbridge Solution: Simultaneous Dual-Channel Engagement

Our architecture is 100% compliant with both Google's policies and the FTC's Consumer Review Rule (effective October 21, 2024). Every completed service triggers a simultaneous dual-track response: a direct link to your public Google profile and a private resolution channel — both delivered to every customer at the exact same moment, with full visibility throughout.

Here is exactly how compliance is maintained:

- We provide a private resolution channel for service issues while maintaining a simultaneous, visible path to public review platforms. No customer is ever prevented from posting publicly.
- A direct link to leave a public Google review is always visible — even on the private resolution screen.
- The private resolution channel is an additional option offered alongside the public path — never instead of it.
- No incentivized reviews: Clients may not offer gifts, discounts, or any reward in exchange for positive reviews. This is a direct violation of the FTC Consumer Review Rule.

### FTC Compliance

The FTC's Consumer Review Rule prohibits fake reviews, incentivized positive-only reviews, and the suppression of negative feedback. Violations carry civil penalties of up to \$53,088 per violation (as of FTC December 2025 enforcement actions). Northbridge's system is designed from the ground up to operate within these rules.

---

## SECTION 5B: DATA SECURITY & PLATFORM ACCESS

We understand that onboarding requires trust. Here is exactly how your data and platform access are protected:

### Your Google Business Profile — Secure OAuth Connection

We connect to your Google Business Profile using Google's official secure OAuth API. This means you authorize read/write access through Google's own permission system — we never ask for your Google password, and you can revoke access at any time directly from your Google account settings.

### Your Customer Data — Encrypted & Private

- All customer data uploaded to your dashboard is encrypted in transit (TLS) and at rest.
- Your customer database is used exclusively for your automated outreach — it is never sold, shared, or used for any other purpose.
- Upon cancellation, your full contact database and review history are exportable and returned to you. We retain no customer data after account closure.

### SMS Compliance — A2P 10DLC Registration

Federal regulations require all businesses sending automated text messages to register under the A2P 10DLC (Application-to-Person 10-Digit Long Code) framework. We handle this registration process during onboarding to allow your messages to be delivered reliably and to help prevent them from being flagged as spam. This is included in your plan — no hidden registration fees.

**Carrier Vetting & Channel Activation:** Per federal A2P 10DLC regulations, **SMS Delivery** requires a 3–7 business day vetting period before activation. **Email Delivery** activates immediately. Your choice of delivery (Email **OR** SMS) determines your go-live date. **Note:** This infrastructure supports one primary delivery channel per sub-account; they do not operate concurrently.

#### TCPA Notice

Northbridge outreach is only sent to customers who have a prior business relationship with you. It is the client's responsibility to ensure all customer contact data represents individuals who have consented to receive communications. Purchased or scraped lists are strictly prohibited and constitute a contract violation.

---

## The Northbridge Dashboard: Your Operational Command Center

---

To maintain a streamlined, high-end experience, your dashboard is curated to show the essential tools required to manage your reputation and customer communications effectively.

### Dashboard — Your "Birds-Eye View"

Your strategic headquarters: monitor live Google Business Profile performance, track unread customer inquiries, and view a real-time feed of your latest public reviews — all without the clutter of unnecessary data.

### Conversations — Your "Command Center"

Every incoming SMS, email, and social media interaction is consolidated into a single, real-time thread. Private feedback submissions and customer inquiries are automatically converted into live conversations so you can respond directly from one screen.

### Contacts — Your "Digital Rolodex"

Your comprehensive customer database houses the full history of every interaction, review, and communication. Maintain detailed profiles, add private internal notes, and manage your growing list of brand advocates with organized precision.

### Reputation — Your "Social Proof & Battle Map"

Track your live Google ratings, respond to public reviews, and execute bulk review requests with a single click. By providing your top three competitors during onboarding, this tab becomes your Real-Time Battle Map — monitoring your star rating and review volume side-by-side with the competition.

---

## The Northbridge Engine: How It Works

---

Northbridge provides a fully automated reputation system designed to take the burden off your hands and keep you ahead of your competition. Our platform acts as a 24/7 digital advocate for your brand.

---

## Simultaneous Dual-Channel Engagement

---

Our system allows every customer to have an immediate voice. By presenting both public and private options simultaneously, we facilitate a high-end service experience that honors transparency while prioritizing business recovery. Every customer is simultaneously presented with two paths: a direct public link to Google and a private resolution channel.

The public review link is always visible — both paths remain equally prominent and accessible at every stage of the customer journey. This allows immediate support for those seeking a fix, without ever obstructing their right to a public voice.

- **Positive Sentiment (4–5 Stars):** High-satisfaction experiences are seamlessly invited to finalize their feedback on Google, amplifying your public reputation in real-time.
- **Service Recovery (1–3 Stars):** For customers seeking resolution, our system triggers an immediate private priority alert to your team, providing the opportunity to resolve issues directly while maintaining the customer's consistent access to public forums.

---

## Real-Time Review Capture

---

We capture your happiest customers at their peak moment of satisfaction by triggering review requests in real-time. Whether you operate in-person, in the field, or digitally, we provide a seamless solution for timely, consistent feedback collection.

- Grow your star rating by capturing more 5-star experiences.
- Improve your Map Pack placement through consistent review velocity.
- Allow timely responses to keep your engagement signals strong.
- Build consumer trust with a steady stream of recent, relevant feedback.

---

## The Existing Customer Reactivation Protocol (Optional Add-On)

---

For established businesses looking for an immediate impact, we offer a one-time Database Reactivation service. We securely import your customer list from the last 3 months and deploy a strategic drip-fed outreach campaign — creating an instant pulse of fresh reviews, delivered within your first 30 days.

**Critical Compliance Note:** To protect your domain authority and sender reputation, this protocol is strictly limited to customers from the previous 3 months. This ensures high deliverability and prevents your account from being flagged for stale data or spam.

---

### SECTION 6: OPERATIONAL BLUEPRINT

#### Request Methods — Choose Your Capture Path

Northbridge is designed to fit seamlessly into your existing workflow. First, you select your primary delivery preference — Professional SMS or Branded Email. This choice dictates how our system communicates with you (internal alerts) and how your customers receive follow-ups. You simply include your exclusive Northbridge Magic Link in the "Thank You" messages you already send after a service. Additionally, every Northbridge partner receives a Feedback Station QR Code, allowing customers to opt-in for an instant review experience while still on-site.

Method	Description	Best For...
SMS Request Engine	Include our Magic Link in your post-purchase texts. 98% open rate reaches customers on the device they already have in hand. QR Code included for storefront, checkout stations, lobby, or waiting areas (for your physical locations).	Mobile & Field Services: Any business working at a client's location.
Email Request Engine	Embed our Magic Link into your project wrap-up emails, digital receipts, or email signatures. Zero manual follow-up required. QR Code included for storefront, checkout stations, lobby, or waiting areas (for your physical locations).	B2B & Digital Services: Any business managing projects or communicating digitally.

### Q: What is the step-by-step flow for my customers?

Our system is built to maximize conversion without adding to your workload.

- **Initiation:** You continue your normal checkout process. By adding our Magic Link to your follow-up communication, you trigger the Northbridge logic. Customers who prefer in-person interaction can scan your Feedback Station QR Code.
- **The Dual-Channel Reputation Architecture:** We use Managed Reputation Infrastructure to simultaneously present both a direct public Google link and a private resolution channel. The public review link is always visible. Higher-rated experiences are fast-tracked to Google. Lower ratings trigger an internal alert for your team, allowing for private service recovery while maintaining full FTC compliance.
- **Managed Follow-Up:** Most reviews are lost to simple distractions. Northbridge addresses this with inactivity detection. We provide exactly two automated follow-ups — one at 30 minutes and one at 24 hours — before closing the workflow.

## Your QR Code — Choose Your Style

### QR Code Scan — How It Works

We provide a high-quality, custom QR code for physical Feedback Stations. When scanned, the customer enters their full name and email or phone number before being redirected to your review survey. Our system captures their data to trigger automated reminders if they get distracted before completing the review.

#### Staff Script

"If you enjoyed your experience today, would you mind scanning this code to check in? It lets us know how we did, and it takes less than 10 seconds!"

Every QR code is built on our tailored routing system and linked directly to your unique sub-account — allowing all feedback to flow into your dashboard and nowhere else. Simply tell us your preferred style during onboarding and we will build it with your logo and colors.

Option	Style Vibe	Best For...
#1 — Slate/Dark	Sleek & Modern	Tech shops, modern barber shops, industrial-themed cafes.
#2 — Rustic Wood	Earthy & Warm	Farm-to-table restaurants, boutiques, hardware/craft stores.
#3 — Gold Filigree	Ultra-Luxury	High-end jewelry stores, luxury spas, bridal boutiques.
#4 — Eucalyptus	Fresh & Organic	Florists, organic grocery stores, yoga studios.
#5 — Watercolour Teal	Soft & Approachable	Pediatricians, therapy offices, creative studios.
#6 — Purple Galaxy	Bold & Trendy	Nightclubs, vape/smoke shops, modern salons.

## The Strategic Breakdown: Choose Your Level

### Tier 1: Reputation Core — \$427/mo

*Managed Reputation Infrastructure & Growth Engine*

For the owner who wants to build a 5-star wall around their business while retaining full control of their customer conversations.

- The QR Capture Loop: Branded physical triggers for on-site review collection.
- Strategic Feedback Response: A simultaneous dual-track feedback sequence that provides a private resolution channel for service issues while maintaining a consistent, visible path to public Google review links. The public review link is always visible.
- The Smart Dashboard: Centralized command center to view growth and manually reply to reviews from one screen.
- A2P 10DLC SMS Registration: Included — no hidden registration fees.
- Support: Email support with 24-hour response guarantee.

#### Best For

Small shops, service businesses, and startups focused on building their foundation and protecting their reputation.

### Tier 2: AI Executive — \$637/mo

*The Hands-Off Authority & SEO Dominance Tier*

Our fully managed service is designed to address the review response requirement without the owner ever lifting a finger.

- The Consistent Response Architecture: Our AI monitors your profiles 24/7 and deploys professional, SEO-optimized responses via Instant API triggers within 5 minutes — 24/7/365. Zero manual intervention required.
- The SEO Signal Booster: Every AI response is injected with local keywords and industry-specific sentiment signals that tell Google your business is the most active and trusted in your area.
- Hype-Man Mode (5-Star) & Concierge Mode (Critical Reviews): Tailored response logic for specific customer sentiment detection.
- Manual Brand-Tone Calibration: Performed by our team during your onboarding to ensure every response sounds like it came from you.
- Manual Control: You retain the ability to provide responses at any time from your dashboard (conversations tab).
- 24-Hour Knowledge Auto-Sync: Your AI Executive continuously syncs with your latest business data. Simply update your website or provide new documentation, and the system recalibrates its response logic within 24 hours.

**Best For**

High-volume businesses and growth-focused owners who want to move from day-to-day operator to strategic CEO.

### Side-by-Side Comparison

Feature	Reputation Core (\$427/mo)	AI Executive (\$637/mo)

<b>AI Response Engine</b>	Not Included	SEO-Optimized
<b>24/7 Monitoring</b>	Not Included	✓ Included
<b>Sentiment Logic</b>	Not Included	✓ Hype-Man Mode & Concierge Mode

## The Northbridge "Intelligent Follow-Up" Protocol

---

### 1. Simultaneous Dual-Channel Engagement

The journey starts with our branded Internal Experience Survey. We listen first. Every customer is simultaneously presented with two paths: a direct public link to Google and a private resolution channel. The public review link is always visible — this allows immediate support for those seeking a fix, without ever obstructing their right to a public voice.

### 2. Activity Detection & The "30-Minute Rescue"

If the system detects a 5-star redirect occurred but no click-through was confirmed within 30 minutes, it triggers a polite Concierge Mode check-in — catching the customer while their experience is still top-of-mind.

### 3. The 24-Hour Anchor (Final Professional Touch)

If the review remains unsubmitted after the initial rescue, the system sends one final check-in exactly 24 hours later — while the memory of the service is still fresh.

### 4. The "Two-Touch" Respect Policy (Workflow End)

We strictly limit automated follow-ups to a maximum of two touches. Smart-Stop Technology cancels all further reminders the moment a successful click or completed feedback survey is detected.

---

## SECTION 7: THE CHOICE OF DELIVERY

Clients elect one primary delivery method at the time of signing to allow for technical reliability and consistent deliverability.

### Option 1: SMS Delivery

- Hard Cap: Outbound texts are strictly locked to 160 characters per message.
- Best For: Mobile-first businesses and field service providers.
- Note: If your message requires more than 160 characters, Email Delivery is the required option.

### Option 2: Email Delivery

- Branded high-performance templates with integrated logo support and detailed feedback capture.
- Best For: Businesses requiring professional inbox engagement and consistent brand presentation.

**International Customers**

Northbridge SMS is a domestic-only service (US/Canada). For any customers with international phone numbers, Email Delivery is the required method to allow for consistent delivery.

### SECTION 8: THE CREDIT SYSTEM — SUCCESS MATH

Your plan includes 2,500 monthly messaging credits. To allow for zero interruption in review velocity, accounts reaching this limit are automatically replenished with a fresh block of 2,500 credits for a flat fee of \$100.00. Here is exactly how credits are used:

Action	Cost	Scenario	Notes
Incoming Messages	FREE	Customer replies to your outreach	No credits used
Review Requests	1 Credit	Every automated outreach to a customer	Standard usage
Internal Alerts	1 Credit	System notification sent to you	Per alert
Manual Staff Replies	1 Credit*	Messages sent from Conversations tab	160-character cap applies
Incoming Media (MMS)	5 Credits	Customer sends a photo or screenshot	High cost — use sparingly

- SMS messages are capped at 160 characters. Manual replies exceeding this will consume 2+ credits per message.
- Monthly Allotment: 2,500 Messaging Credits included per month (1 Credit = 1 Email OR 1 SMS).
- Internal Alerts (Default ON): All accounts are configured with Internal Alerts ON by default. Each external alert consumes 1 credit. Clients may opt out to preserve credits, but must then manually monitor the System Notification Bell daily.
- Automated Negative Feedback Sequence: Workflows triggered by negative customer sentiment (1-3 stars) utilize an automated 2-credit sequence: 1 credit is allocated to route the instant internal alert to your staff's mobile device, and 1 credit is utilized to initialize the outbound customer outreach thread, enabling you to instantly view and reply to the contact directly from your live Conversations tab.
- Credit Preservation Tip: For extended discussions or technical support follow-ups, move the conversation to your primary business email to preserve credits for high-impact review generation.
- Messaging Credit Replenishment: If you exceed 2,500 messaging credits, a new block of 2,500 is added for a flat \$100.00. Auto-Replenish must be explicitly enabled in dashboard settings. These replenishments are non-refundable once processed. Any remaining balance at termination is forfeited unless otherwise agreed in writing.
- Authorized Use Only: This platform is a dedicated Reputation Management tool. High-volume marketing blasts, newsletters, or large file attachments are strictly prohibited and may result in service suspension.

#### Pro-Tip

Bookmark your portal link and enable notifications via the bell icon (top right of your dashboard) to stay informed of new reviews and messages in real time — at zero credit cost.

## SECTION 9: AI EXECUTIVE DEEP-SYNC LOGIC

The AI Executive tier is a fully managed setup designed to shift the business owner from daily operator to strategic CEO.

- **5-Minute Response Delay:** Programmed intentionally to allow responses to appear organic and authentic to readers — not robotic.
- **Brand-Tone Deep Sync:** We train the AI on your specific business hours, services, and owner name to allow every response to sound like it came from you.
- **Manual Brand-Tone Calibration:** Performed by our team during your onboarding to calibrate your brand voice accurately from day one.
- **SEO Optimization Defined:** Every AI response is written to naturally include your city, business category, and relevant service keywords — the signals Google uses to determine local authority. No keyword stuffing; organic integration.
- **Strategic Response Guardrails:** Authoritative, brand-calibrated engagement for every review. Posted within 5 minutes. No noise. No redundancy. Designed for surgical precision, not automated spam.
- **Interaction Cap:** To ensure professional brand standards and dialogue quality, the AI is configured to provide a maximum of three (3) automated responses per unique review thread.

---

## SECTION 10: LEGAL & COMPLIANCE GUARDRAILS

Northbridge Review Systems operates in strict accordance with FTC Consumer Review Rule standards (effective October 21, 2024) and Google's content policies.

- **Anti-Gating Protocol:** Northbridge does not restrict or redirect dissatisfied customers. We utilize a Simultaneous Dual-Channel Engagement model: a private resolution channel for immediate support and a direct public Google link for transparency. Both paths remain equally prominent and accessible — and the public review link is always visible — to all customers at all times.
- **No Incentivized Reviews:** Clients may not offer gifts, discounts, or any incentive in exchange for positive or 5-star reviews. This is a direct violation of the FTC Consumer Review Rule.
- **Authenticity Requirement:** Client warrants that all customer data represents genuine customers with real service experiences. Purchased or scraped contact lists are strictly prohibited.
- **TCPA Compliance:** Clients are responsible for allowing only those contacts in their uploaded database who have a prior business relationship and have not opted out of communications.
- **Data Retention:** Customer data is retained only for the duration of your active subscription. Upon cancellation, all data is exportable and deleted from our systems upon written request.

---

# Activation & Onboarding — 3 Steps to Launch

---

## Step 1: Infrastructure Activation

Visit [northbridgereviewsystems.com/activation](https://northbridgereviewsystems.com/activation) to select your tier and complete your secure checkout. Month-to-month — cancel anytime with 30 days written notice.

## Step 2: Engine Calibration

After payment, you will be automatically routed to your Service Contract where you will officially elect your Delivery Preference (SMS or Email). The contract outlines your full terms, data handling policy, automated replenishment logic, and cancellation procedure.

## Step 3: The Handover — Infrastructure Live within 5 Business Days

To build your custom dashboard, you will provide the following. We handle the complete technical build and carrier registration. Your system is live within 5 business days of formal activation — or your first month is on us.

1. Brand Assets: Upload your high-resolution company logo.
2. Platform Access: Authorize secure OAuth access to your Google Business Profile — no passwords required.
3. Database Jumpstart: Upload a CSV of your last 30–90 days of customers to trigger the initial outreach workflow. (Genuine prior customers only — no purchased lists.)
4. Competitor Intel: Provide the names of your top 3 local competitors to activate your Real-Time Battle Map.
5. QR Style Selection: Tell us your preferred QR template number (see Section 6). Your branded code will be ready to print from day one.

### A Note from the Founder

Northbridge Review Systems | Las Vegas, NV

*Northbridge was built in 2026 to solve a specific problem: Google's algorithm now rewards businesses that generate consistent, recent reviews — and penalizes those that don't, regardless of*

*service quality. Most local business owners are too busy running their business to think about review velocity.*

*This system exists to handle that silent, behind-the-scenes work so you can focus on what you do best: serving your customers. We are not a software company selling you a login. We build, configure, and manage your entire reputation engine — and we stand behind it with direct support.*

*We are honored to help you protect your reputation and grow your reach.*

---

**Ready to turn your reputation into your greatest growth asset?**

Your 24/7 automated growth engine is waiting.
