PROFESSIONAL SUMMARY

Final-year Diploma in Information Technology in Software Development student with practical experience in web development, database design, Android development, and systems analysis. Skilled in Java, C#, Kotlin, SQL, HTML, CSS, JavaScript, and ASP.NET Core MVC, with experience building academic, freelance, and team-based projects. Strong problem-solver who takes initiative, learns quickly, and enjoys turning requirements into clean, usable digital solutions.

EXPERIENCE

Freelance Web Developer

Digital Web Solutions, Cape Town June 2025 - Present

- Build and maintain responsive websites for small businesses using HTML, CSS, JavaScript, and CMS-based platforms.
- Create service pages, contact forms, WhatsApp integrations, CTAs, and mobile-friendly layouts.
- Communicate directly with clients to understand requirements, plan updates, and deliver practical website improvements.
- Apply basic SEO, user experience principles, and clean layout design to improve online presence.

Project-Based Software Developer

Academic and Personal Projects Jan 2024 - Present

- Develop software, web, database, and mobile projects using modern development tools and structured problem solving.
- Use Visual Studio, Android Studio, IntelliJ IDEA, NetBeans, Figma, GitHub, and database tools to design, test, debug, and document solutions.
- Lead team projects by helping organise tasks, align deliverables with requirements, support team members, and keep work on track.

SELECTED PROJECTS

Contract Monthly Claim System (CMCS)

C#, ASP.NET Core MVC, Database Concepts

Designed and developed a lecturer claim management system with claim submission, document uploads, approval workflows, and claim tracking functionality.

BudgetBuddy Budget Tracking App - Team Lead

Kotlin, Android Studio, Local Database

Led a team project to build a modern budget tracking app with expense tracking, category management, goals, database storage, and a functional user experience.

Client Management & Project Tracking System - Team Lead

Figma, Systems Analysis, UX, Reporting Dashboards

Led the design of a CMS-style system with role-based logins, dashboards for clients, admins and IT users, report displays, and project tracking workflows.
