

Your wet area compliance expert on your project. For the life of the job.

Australia's leading wet area compliance experts — embedded into your project for the life of the job.

The Problem:

Most builders running long-term projects don't have a wet area specialist available when decisions need to be made on site. Waterproofing failures are costly, compliance requirements are increasing, and the window to catch issues is narrow.

What's Included:

- ✓ Expert consulting hours allocated to your project every month — questions answered, designs reviewed, issues caught early.
- ✓ On-site training for your teams and trades so the people doing the work know what right looks like
- ✓ Regular site inspections to verify compliance and catch risk before it impacts delivery.
- ✓ CompliBuild QA software — real-time checklists, inspections, and reporting across your project.

\$4 Billion

Lost annually to water-related defects in Australian construction. The rules are tightening — NCC 2025, the Buyer Protections Act 2025 and Construction Enforcement Victoria Bill 2026 are all coming.

"...Saved us time, reduced defects, and increased our teams' quality awareness and skills. This hybrid approach is something I would recommend to all builders."

— Robert Skillman, Program Manager, MBS FM
