

Wet area training that holds up on site.

Byron Landeryou, with your team, on your projects. Built around how wet area compliance applies in practice. Not theory, not a generic lecture. Practical knowledge your team can understand and implement.

Ready to deliver.

A proven program refined over a decade with builders and manufacturers across Australia. Now on your site. You pick the date.

Online, or on-site.

Online is preferred — cost-effective and quick to schedule. Onsite available at your office or on a project. Half a day either way.

Built to protect you.

The standards, the failure points behind most defects, and the documentation that holds up when a dispute hits.

About Complibuild

CompliBuild was founded by Byron Landeryou — Victorian Committee member of the Australian Institute of Waterproofing, and a Master Builders Victoria course designer and trainer. Over 3,500 students have come through his training — architects, surveyors, builders, manufacturers, and tradespeople across Australia. We exist because wet area defects cost the industry \$4 billion a year and most of it is avoidable.

What's covered

NCC 2025 changes that affect your scope. AS 3740 and AS 4654 applied to your jobs. Substrate prep, penetrations, drainage falls, membrane selection. Inspection test plans and the records that protect you. Q&A on your jobs, with your team.

Scan the QR code to request a call back. We'll come back in one business day.

How it works

1

Tell us about your team

Fill in a short form or book a 15-minute call. We'll cover your team, your projects, and whether the training is a fit.

2

We lock the date

If it's a fit, we scope it and book it in. Half a day, your team. Byron travels nationally.

3

Delivered to your team

The standards, the failure points behind most defects, and the documentation that holds up when a dispute hits.

4

Take it back to site

Documented learnings, an inspection test plan you can implement immediately.

Byron Landeryou

Founder, Complibuild • AIW Victorian Committee • MBV trainer

Over 20 years in construction, starting on the tools as a wall and floor tiler and waterproofing sub-contractor. Course designer and trainer for Master Builders Victoria across internal, external and below-grade waterproofing. Has taught over 3,500 students nationally — architects, surveyors, builders, manufacturers, and tradespeople. He is on sites, in the detail, every week.

"Absolutely the best sessions, content and education on a topic I have attended for quite some time. Stellar job Byron and all associated."

Anthony Cregan

Building Codes Consultant
Trident Building Certification
