Minnesota winters leave behind more than just memories – salt, sand, moisture, and grime build up in places you don't always see.

Spring and summer are the perfect time to:

- Restore your vehicle's appearance
- Protect it from long-term damage
- Maintain its value

*This guide will show you how – and when – to wash vs. detail.

www.onthespotmn.com

Hidden Damage “You Shouldn’t Ignore” even if your car looks “fine,” winter likely left behind:

-  Salt buildup (causes corrosion & rust)
-  Moisture trapped in carpets and mats
-  Film on glass reducing visibility
-  Interior wear from boots, sand, and debris

 The longer it sits, the worse it gets.

When to Wash vs. When to Detail

Get a WASH when:

- Your exterior is dirty or salty
- You need quick maintenance
- You want better visibility and shine

Get a DETAIL when:

- Interior is dirty, stained, or smells
- Salt buildup is heavy
- You want to restore and protect your vehicle
- It's been months since a deep clean

 Rule of thumb:

Wash regularly. Detail seasonally.

Spring/Summer = Reset Your Vehicle Detailing does more than clean:

- Removes deep winter salt buildup
 - Restores interior surfaces and materials
 - Protects against long-term wear
 - Improves resale or trade-in value
 - Makes your vehicle feel new again
- 👉 This is the most important detail of the year

Keep It **Looking Good** All Summer
Once your vehicle is clean, protect it:

- Wash regularly to prevent buildup
- Use wax or ceramic protection
- Clean bugs and debris quickly
- Protect interior from sun damage
- Keep mats and carpets maintained

👉 Maintenance is easier than
restoration

www.onthespotmn.com

Simple Ways to **Extend Your Clean**

- Don't let salt sit – even in spring
- Vacuum regularly between details
- Keep a microfiber towel in your car
- Avoid letting stains “set” in upholstery
- Schedule your next detail before you need it

👉 Staying ahead saves time and money
