CAMBRIDGE® COOL COLORS PLUS

Architectural Shingles

iko.com/na

Cool Looks with Even Cooler Reflective Technology

IKO Cambridge Cool Colors Plus shingles boost your home's curb appeal and can be used to comply with California's Title 24, Part 6. Cambridge Cool Colors Plus shingles may even lower your energy bills depending on your location, HVAC system, utility rates, and other factors.

IKO Cambridge Cool Colors Plus shingles offer an SRI of 20 or greater², helping you exceed California's roof reflectance requirements.

Color Featured: Weatherwood

Cambridge Cool Colors Plus shingles are part of the IKO Cambridge line, which has delighted homeowners coast to coast for decades with a great product that offers consistent performance at a reasonable cost.

The IKO Difference

With a legacy of craftsmanship that spans over 75 years, we know quality. That's why contractors and their customers trust IKO to deliver beautiful, high-performing roofing systems that can withstand the most rigorous conditions — and continue protecting families for generations to come.

What sets Cambridge Cool Colors Plus Shingles Apart

1 Superior blow-off prevention
Printed nail lines guide installers for the most accurate positioning and fastening, helping keep shingles on the roof and preventing them from blow-off in high winds.

2 Stay-put bonding
Our shingles feature IKO FastLock® sealant strips along their bottom edges, which get extra tacky when activated by the heat of the sun for maximum bonding and performance against wind uplift and water penetration.

3 Cool roof compliant
Cambridge Cool Colors Plus shingles are specially engineered and can be used to comply with California's Title 24, Part 6 cool roof requirements, achieving an SRI of 20 or greater² from embedded infrared-reflective pigments.

4 Fiberglass mat core strength
We make our own fiberglass mat, which is coated top and bottom with weathering asphalt, then surfaced with colored granules for exceptional durability and structural integrity.

STANDARDS & SPECIFICATIONS^{6,7}

Limited Warranty ³	Limited Lifetime ⁵	Length	40 7/8 in (1,038 mm)
Iron Clad Protection ³	10 Years (U.S. ONLY)	Width	13 3/4 in (349 mm)
Limited Wind Warranty ²	110 mph	Exposure	5 7/8 in (149 mm)
Limited High-Wind Warranty Upgrade ^{3,4}	130 mph	Coverage per Bundle	33 1/3 sq. ft (3.1 sq. m)
		Shingle per Square	60

ASTM D3462 • ASTM D3018 • ASTM D3161 - Class F • ASTM D7158 - Class H • ASTM E108/UL 790 - Class A
• FM 4473 - Class 3⁹ • UL 2218 - Class 3⁹ • CRRC-1 SRI 20+

Cambridge Cool Colors Plus shingles are designed to comply with California's solar reflectance¹ requirements — while safeguarding your home — with features like:

- ✓ Heavy-duty construction from a fiberglass mat core.
- ✓ Class 3 impact resistance rating⁸.
- ✓ A solar reflectance index (SRI) of 20 or greater² thanks to embedded infrared-reflective pigments.
- ✓ Roof reflectivity 25% over the minimum requirement.
- ✓ A wide array of stunning color blends to match your home's style.
- ✓ TrueSquare Advantage shingle sizing with 5 7/8-inch exposure.

 Available in select US markets.

⁸The impact resistance ratings are solely for the purpose of enabling residential property owners to obtain a reduction in their residential insurance premium, if available.

Shingles are your home's first line of defense, but they protect, perform and look their best installed with the **IKO Proformax Integrated Roofing Accessories** shown below.

PROFORMAX ROOFING COMPONENTS

1 DECK PROTECTION	2 SYNTHETIC UNDERLAYMENT	3 ROOF STARTERS	4 CAPPING SHINGLES
IKO GoldSeam® IKO StormShield®	IKO Stormtite®	IKO Leading Edge Plus™ or IKO EdgeSeal®	IKO Hip & Ridge 12™ IKO Ultra-HP®

IMPORTANT! To ensure complete satisfaction, please view several full-size shingles and an actual roof installation prior to final color selection as the shingle swatches and photography shown online, in our brochures and in our **ROOFViewer®** tool may not accurately reflect shingle color and do not fully represent the entire color blend range nor the impact of sunlight.

NOTE: Product and color availability may vary by region. Products with Miami Dade NOA and FBC product approval listings are available. Meets Texas Department of Insurance requirements. Contact IKO for details. ¹Solar reflectance is the roof's ability to reflect solar energy. SRI values range from 0 to 100 — and the higher the SRI, the better the roofing material's ability to reduce heat transfer into the home. Solar Reflectance Index (SRI) is calculated by ASTM E1980. ²Shingles with an SRI of 16+ can be used to comply with California Title 24, Part 6 and shingles with an SRI of 20+ can be used to comply with LA County and City requirements, in lieu of meeting the aged solar reflectance and thermal emittance requirements. To determine if the LA City and County requirements apply, visit the LA County website. ³Refer to the Limited Warranty at IKO.com for full terms, conditions, restrictions and application requirements. Shingles must be installed per application instructions and local building codes. ⁴High-wind application is required. ⁵"Lifetime" refers to the period from installation until the original Owner no longer owns the building. ⁶All values are approximate. ⁷Products are developed with reference to these standards. ⁸Impact rating is solely for potential insurance premium reductions and is not a performance guarantee, implied or express warranty of any kind. Hail damage is not covered under the Limited Warranty. IKO recommends Class 4 or 3 impact resistance rated Hip and Ridge capping shingles be installed with corresponding impact rated shingles (refer to FM Approvals for more details on the FM 4473 test standard and to UL Solutions for more details on the UL 2218 test standard).
