Westlake Royal™ Cool Roof System

5 components provide energy efficiency and give substantial return on your investment.

Concrete or Clay Tile

- Highly efficient material due to high thermal mass and insulating air space beneath the tiles
- Class A fire rated
- Durable & long lasting¹

**Westlake Royal TileSeal™
Underlayment**

- Extremely strong polyester surface
- Self-adhesive for high wind areas and eliminates faster penetration
- Self-seals around tile fasteners
- Miami-Dade and Florida approved

Vented Eave Riser

- Provides ventilation naturally without electricity
- Elevates eave tiles with Elevated Batten System®
- Different styles fit Newpoint™ Concrete Tile profiles
- Profiled styles are decorative and functional

Elevated Batten System®

- Provides effective thermal barrier and ventilation
- Prevents water damming
- Significantly less penetrations through underlayment
- 100% post-consumer recycled plastic pads

Vented Ridge

- Exhaust ventilation at the ridge
- Hidden beneath ridge tiles at the peak of the roof
- Butyl adhesive strips provide a weather-tight seal
- Molds to all tile profiles

Energy Savings Every Year

Significant reduction
in heating and cooling costs

Why Tile?

NATURAL PROTECTION

Attic temperatures measured using identical heat sources simulating the sun's radiation comparing standard concrete roof tile to a common asphalt shingle. The result is less heat in the attic and lower energy bills.
