Wellness In Infrastructure

FINALIST

Best Team Collaboration For Psychosocial Safety

The Wellness in Infrastructure Working Group brings together more than 70 volunteers across 48 organisations in Queensland, NSW, Victoria and South Australia. The group spans industry leaders, HSEQ and HR professionals, engineers, researchers, emerging leaders and students, with collaboration supported by specialist subgroups, university partnerships and industry engagement workshops.

The group has developed industry-wide tools and programs informed by research and psychosocial risk data. These include the Psychosocial Analysis Tool, piloted across seven organisations and eight major projects, and the Integrated Approach to Wellbeing, which recorded improvements in depression, anxiety, burnout and work-life balance dissatisfaction over 12 months.

The judges were impressed by the scale and ambition of the initiative, recognising its grounding in research into psychosocial wellbeing within the industry and the application of multiple solutions over a number of years.

10 September, 2026 – Tweed Heads
