

Quick Weave Survival Checklist

Protect your hair from prep all the way through removal.

Protect first

- ☐ Hair cleansed & fully dried
- ☐ Protective cap fully sealed — **no exposed hair**
- ☐ Edges left out and protected

Install

- ☐ Bonding glue on the **cap only** — never skin or hair
- ☐ Thin, even layers
- ☐ Clean, intentional direction

While you wear it

- ☐ Keep edges moisturized
- ☐ Keep the scalp clean
- ☐ Wear 2–4 weeks max

Removal — the part that saves your hair

- ☐ Use proper adhesive remover
- ☐ Dissolve fully — **never peel it off dry**
- ☐ Take your time

Aftercare

- ☐ Clarify, then deep condition
- ☐ Let your hair breathe before the next install

✦ EBONY'S TIP

Never rush removal. Peeling a quick weave off dry is the **#1 way women lose hair and edges** — dissolve, don't pull.
