

RELEASE NOTES

ComplianceGo delivers a streamlined, all-in-one solution that simplifies complex environmental compliance workflows, helping teams stay organized and audit-ready at all times. Its user-friendly interface and mobile capabilities make it easy for field and office teams to collaborate efficiently, reducing delays and miscommunication.

ENHANCEMENTS

- Improved the search for notification recipients.
- Users can now control what weather information shows up during an inspection and on their inspection reports.
- Redesigned the Close Action Item page.
- Changed the Identifier & Title fields to link to an action item in the action log report.
- Changed the role assignments when adding a new user to default to none.

BUG FIXES

- Fixed an issue that caused site map icons to become unmoveable after they were edited.
- The "My Location" button on the dashboard map will now function correctly again.
- The 7-Day Forecast will now display even if a site is inactive. The information was always saved, it just did not display if the site was inactive.
- Corrected an issue that caused some of the weather fields to not show up on the forms even if the information was available.
- Form response defaults can now correctly be assigned to answers other than the first answer.
- Corrected display issues around the rows per page and advance page arrows on reports.
