

RELEASE NOTES

With powerful automation and centralized data management, ComplianceGo empowers companies to proactively manage compliance instead of reacting to issues. The platform enhances visibility across all teams and projects, enabling faster decision-making and consistent adherence to regulatory requirements.

ENHANCEMENTS

- Numerous security and resiliency updates.

BUG FIXES

- Fixed scheduling and UI issues, including overlapping menus and unresponsive Action Item form fields.
- Restored correct display of settings and data, such as Included Controls/Action Items and readable notification names.
- Resolved map-related problems, including legend activation, saving new map items, and secure connection warnings on inspection maps.
- Corrected user role and output issues, including removal of an incorrect "Editor" role and fixing QR code display on printouts.
