

# CAPABILITY STATEMENT

# Powering Melbourne's future with trusted, end-to-end solar solutions built to last.

Electrician-led and Melbourne-wide, we specialise in custom, end-to-end solar installation and maintenance for residential and commercial projects delivering complete in-house solutions with expertise you can trust.

**10+**

YEARS OF EXPERIENCE

**100%**

IN-HOUSE DELIVERY

**15+ MW**

OF CLEAN ENERGY DELIVERED

## POWERING PROGRESS WITH PURPOSE

At Willco, we believe renewable energy should be simple, efficient, and built to endure. We go beyond standard solar installation; engineering complete energy systems that are smarter, cleaner, and designed for long-term performance.

Our expertise spans residential, commercial, and construction-scale projects, allowing us to deliver tailored solar, battery, and EV solutions that meet the evolving demands of modern living and

business. From tender and feasibility through to design, procurement, and commissioning, every stage of your project is managed by our in-house team.

This integrated approach ensures consistency, transparency, and craftsmanship in everything we do, giving our clients the confidence that their investment in renewable energy is both reliable and future-ready.

# OUR EXPERTISE

We deliver tailored solar and energy solutions for both residential and commercial projects designed for performance, reliability, and long-term value.

## Residential & Commercial Solar Installations

From homes to large-scale commercial projects, we design and install efficient solar systems that reduce energy costs and maximise sustainability for every property type.

## Multi-Residential & Allume SolShare Solutions

For multi-dwelling buildings, we implement shared energy systems such as Allume SolShare to provide equitable solar access across apartments or tenancies, improving efficiency and value for all residents.

## Carpark Solar Systems

We design and install carpark solar structures that not only generate clean energy but also provide shade and weather protection, enhancing both function and form.

## EV Chargers

We supply and install electric vehicle charging solutions that complement solar systems and prepare homes and businesses for a more sustainable future.

## Construction Project Integration

We work alongside builders, developers, and contractors to integrate solar into new and existing construction projects, streamlining installation timelines and ensuring compliance from the ground up.

## Multi-Residential & Allume SolShare Solutions

For multi-dwelling buildings, we implement shared energy systems such as Allume SolShare to provide equitable solar access across apartments or tenancies.

## Battery Storage Solutions

Our tailored battery systems store excess solar energy for later use, improving energy independence and reducing reliance on the grid even during peak demand.

# YOUR SOLAR JOURNEY

At Willco, our values guide everything we do, from the way we design and deliver projects to the relationships we build along the way.

1

## Consultation & Assessment

We discuss your energy needs, assess your property, and explore the best solutions for your home or business.

2

## Custom Design & Quote

Our team creates a tailored plan and provides a transparent quote, ensuring you know exactly what to expect.

3

## Installation & Setup

Our licensed electricians handle the installation with care and precision, keeping you informed every step of the way.

4

## Support & Optimisation

After installation, we ensure your system runs smoothly, provide ongoing support, and help you maximise energy efficiency.

## OUR END-TO-END SERVICE

At Willco, our values guide everything we do, from the way we design and deliver projects to the relationships we build along the way.

### Tender Pricing & Feasibility Studies

We provide accurate, transparent cost estimates and feasibility reports to help you make informed decisions and achieve the best energy outcomes for your project.

### Project Management & Procurement

From materials sourcing to installation scheduling, we coordinate every step to ensure your project runs efficiently and within budget.

### Grid Connection Applications

We handle all grid connection paperwork and technical requirements, ensuring your system is safely connected and compliant with local energy networks.

### Engineering & System Design

Our engineers design tailored solar and battery systems that maximise performance, and integrate seamlessly with your building's electrical infrastructure.

### Construction, Installation & Commissioning

Our in-house electricians manage every phase of construction and installation, delivering high-quality workmanship and complete system commissioning.

### Maintenance & Monitoring

Our ongoing maintenance and monitoring services ensure optimal system performance and long-term reliability, protecting your investment well into the future.

## FOUNDATIONS OF OUR WORK

At Willco, our values guide everything we do, from the way we design and deliver projects to the relationships we build along the way. We're committed ensuring every solar solution is built to perform, last, and make a real impact.

### IN-HOUSE EXPERTISE

Every project is managed and completed by our own trusted team, ensuring full control, accountability, and consistency from start to finish.

### PROJECT DELIVERY

From concept to commissioning, we deliver each project with precision, efficiency, and transparency to meet deadlines and exceed expectations.

### QUALITY

Our commitment to craftsmanship and attention to detail ensures every system is built to perform, last, and deliver measurable value.

### SUSTAINABILITY

We design energy solutions that create long-term environmental and financial benefits, helping build a cleaner future for Melbourne and beyond.
