

Capital Dental

Smile with Confidence. Dentistry Designed Around You

About Capital Dental

Capital Dental is led by a highly experienced principal dentist, **Dr. Maria Andersson**, with over 20 years in the field and a global foundation of training - from Siberia to the United States, Sweden, and Australia. Her journey into dentistry began with a desire to help people smile freely and live with greater confidence, an ambition that still drives the team today.

After many years working in various Canberra practices, she set out to create something different: a dental clinic built on approachability, transparency, and genuine care. A place where patients could feel at ease, ask questions openly, and receive treatment tailored to their goals.

Now, with a dedicated team of 12 and counting, Capital Dental continues to grow, welcoming new patients, transforming smiles, and making dental visits something to look forward to.

Our Philosophy:

We believe dentistry should be stress-free, supportive, and personalised. Whether you're here for a routine clean or a full smile makeover, we focus on making you feel calm, informed, and in control of your treatment.

A Dental Experience Designed for Comfort, Clarity, and Confidence

At Capital Dental, we believe visiting the dentist should leave you feeling empowered—not overwhelmed.

Grounded in Trust, Built on Transparency

From your first appointment to your final follow-up, we're upfront about every step. You'll know exactly what your treatment involves and what it costs—no surprises, ever.

Care You Can Rely On

With over 20 years of experience, our team is here to provide expert care with a genuine human touch. We're passionate about helping you smile with confidence and clarity, and we're always learning, evolving, and growing.

Comfort-First Dentistry

Our thoughtfully designed space helps put even the most anxious patients at ease. Enjoy soothing touches like warmed eye masks, hand cream, and entertainment options during your appointment—all while receiving world-class care in our state-of-the-art chairs.

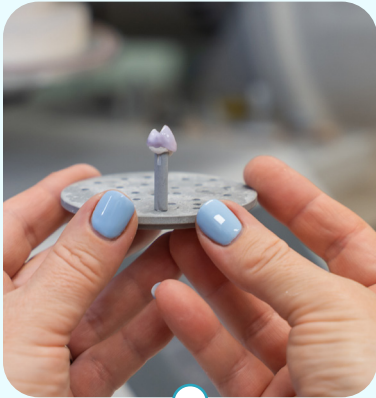

Modern Dentistry Made Simple

We've taken the hassle out of dental care. Book online, complete forms ahead of time, and access high-end technology like digital scanning, Airflow cleaning, and oral sedation. It's advanced dentistry, made beautifully simple.

Aesthetic Treatments

Cosmetic dentistry at Capital Dental is about more than aesthetics – it's about helping you feel your best. With advanced technology and a highly experienced team, we create natural-looking results in a comfortable and supportive environment.

Porcelain Crowns & Veneers

Our ultra-thin, custom-made veneers enhance the shape, colour, and alignment of your teeth. Ideal for discolouration, chips, wear, or gaps, they deliver natural-looking, long-lasting results with minimal impact to your natural teeth.

Clear Aligners

Clear aligners are a discreet, comfortable way to straighten your teeth without braces.

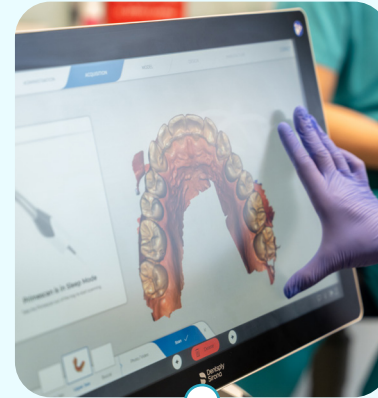

Worn in stages, each aligner gently shifts your teeth into place, moving you closer to your ideal smile.

Teeth Whitening

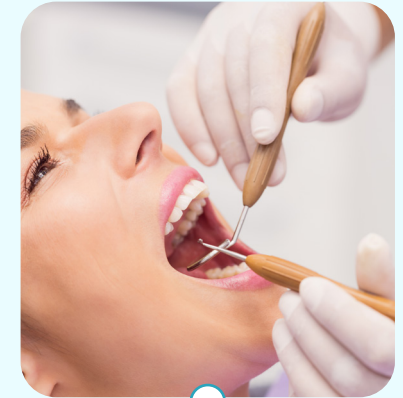

Brighten your smile with our fast, effective whitening treatments.

Whether for one tooth or your full smile, we tailor each treatment to deliver noticeable, lasting results.

Dental Crowns

Crowns restore and protect damaged or weakened teeth, offering both strength and a natural look. We provide same-day and traditional options based on your needs and case complexity.

Fillings

Our tooth-coloured composite fillings restore strength and appearance while preventing further decay.

We use advanced techniques for long-lasting, natural-looking results.

Preventive Dentistry

Preventative dentistry is the foundation of lifelong oral health. Our friendly team helps you stay ahead of problems through regular cleans, hygiene treatments, and personalised advice.

Dental Clean & Polish

Regular dental cleans help prevent decay, gum disease, and bad breath by removing plaque, tartar, and surface stains. Our thorough clean-and-polish appointments leave your teeth feeling smooth and refreshed while supporting long-term oral health.

Dental Examination

Our comprehensive dental exams are designed to catch issues early—before they become bigger problems. From checking for decay and gum disease to assessing your bite and jaw alignment, your oral health is thoroughly evaluated and clearly explained.

X-Rays

Dental x-rays allow us to detect issues that aren't visible during a standard exam, like hidden decay, bone loss, impacted teeth, or infections. With advanced imaging, we gain a clearer picture of your oral health and can plan treatments with precision.

Fissure Seal

Fissure sealants are thin, protective coatings applied to the deep grooves of back teeth, helping to shield them from food, bacteria, and plaque. Especially effective for children or teens, this quick, painless treatment can significantly reduce the risk of cavities in vulnerable areas.

Restorative Dentistry

From minor repairs to full restorations, our team delivers high-quality results with a gentle touch. We use modern materials and techniques to restore your smile's function and appearance.

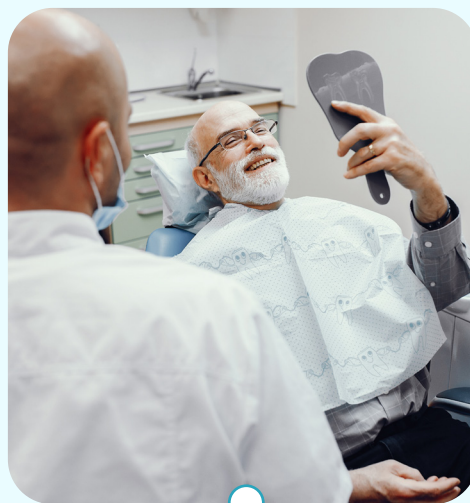

Fillings

We offer both temporary and permanent composite resin fillings designed to blend naturally with your teeth. Whether you need a quick repair or a long-term solution, our team delivers restorations that are durable, discreet, and tailored to your needs.

Implants

Dental implants are a long-term solution for replacing missing teeth. Acting as artificial roots, they support custom restorations that restore function, appearance, and confidence; without compromising surrounding teeth.

Dentures

Dentures are removable appliances used to replace missing teeth, helping you regain function, appearance, and confidence. Whether you're missing a few teeth or a full set, our dentures are designed for a natural look and secure fit.

Root Canal Treatment

We're proud to be one of the few dental clinics equipped with a surgical operating microscope. Offering enhanced accuracy, cleaner results, and better long-term outcomes for root canal treatment.

Surgical Dentistry

From minor repairs to full restorations, our team delivers high-quality results with a gentle touch. We use modern materials and techniques to restore your smile's function and appearance.

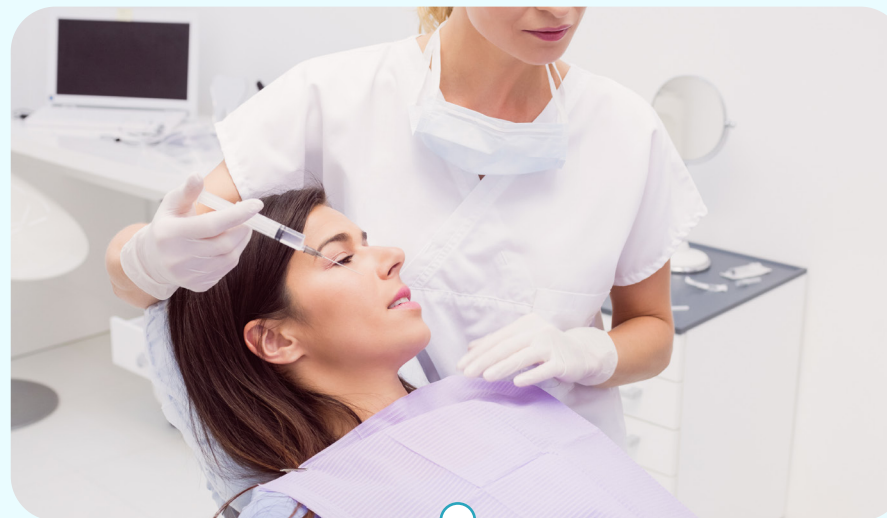

Implants

Dental implants are a long-term solution for replacing missing teeth. Acting as artificial roots, they support custom restorations that restore function, appearance, and confidence; without compromising surrounding teeth.

Replace single missing teeth with lifelike, custom-made crowns.

Fill larger gaps with secure, implant-anchored bridges.

Enjoy added comfort and stability with implant-supported dentures.

Extractions

When a tooth needs to be removed, our team ensures your comfort every step of the way. Using advanced techniques, we make the extraction process as smooth and painless as possible; always with your peace of mind at the centre.

Modern, Minimally Invasive Techniques

Personalised Aftercare For Smooth Recovery

Sedation Options For Anxious Patients

Want To Know More Before You Book?

We're happy to chat. Ask us anything about your dental care, our services, or what to expect and our friendly team will get back to you with the info you need.
