

Our Story

WHO WE ARE

My name is Daniel and along with my wife Dora and our three children we want to provide you with transparency and recreate the link between you and your farmer.

Dandaraga Springs is located in Crookwell on the southern tablelands of NSW. We are a first generation farming family dedicated to regenerative agriculture using a holistic approach to producing single source, chemical and pharmaceutical free, beyond organic, grass fed and grass finished beef.

"From our paddock to your plate, from our family to your's"

WHAT WE DO

Following the regenerative agriculture movement our holistic, rotational grazing system mimics the principles of nature. Our cattle are moved everyday onto fresh pasture, leaving their manure behind which acts as a fertiliser, eliminating the need for any chemical or pharmaceutical inputs. This Method gives our pastures time to recover, and for the roots to grow deep into the soil, storing carbon which helps retain moisture in the soil, especially during dryer times.

The cattle are the centrepiece of our operation, we've sourced some of the best genetics from around the country in our breeding herd to provide you with a high quality end product. The welfare of our cattle is deeply important to us and are thoughtfully taken care of from the day they are born til their "One Bad Day".

"Our healthy soil grows healthy plants, those healthy plants grow healthy animals, our healthy animals feed healthy people."

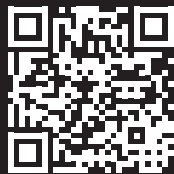

WHY WE DO IT

"Dandaraga springs was founded from a simple mission of providing quality food for our family. After battling some health issues we set out to produce clean, healthy, organic produce for our family as we couldn't find what we wanted from the supermarkets.

When you choose Dandaraga Springs, you're choosing to support regenerative farmers. All our efforts and decisions are based on animal welfare and environmental sustainability. There's also the satisfaction of knowing you're feeding your family the finest quality beef that has been treated with care and respect right throughout its life.
