

Life Force® Carbon™

30 L

Humic acid-based, high carbon soil conditioner for the planet

All the benefits of top-quality compost without the unpredictability. Compost is an extraordinary input for improving soil and plant health, but it can break down just weeks after application. Furthermore, inferior composts can be a source of weed seeds or even plant pathogens, as well as a potential cause of nitrogen-drawdown.

Life Force® Carbon™ contains a unique blend of humates, composted with a rich suite of natural components to produce a fortified, stabilised carbon blend, the benefits of which will continue for years in the soil. An effective composting process is rigorously followed to ensure a quality-assured soil conditioner, with a balanced pH and an optimum carbon/nitrogen ratio.

Life Force® Carbon™ supplies a rich source of stable humus but, more importantly, it provides an injection of cellulose-digesting fungi (missing in so many soils) that can help reclaim the humus-building, planet saving capacity of your soil. with beneficial biology for a flourishing, low maintenance growth system – perfect for home

Product Benefits

- Enrich soil with stabilised humus to improve soil health
- Stabilised carbon blend for reduced application frequency vs common compost
- Increase moisture retention of light soil
- Improve soil structure and help improve friability of heavy soils
- Boost soil microbial activity for increased nutrient availability and improved plant resilience
- Low odour blend
- Will not burn and is suitable for natives
- Australian Certified Organic (ACO) Registered Farm Input 456AI.

Typical Analysis W/V

CONTAINS 40% CARBON

Application Rates

Type	Rate
Commercial Growers and Landscapers	1.5 – 5 cubic metres per ha
Garden Beds:	Spread a 3 – 5 mm layer of Life Force® Carbon™ over garden beds. Work into the top 10 – 15 cm of soil where practical (do not disturb roots of existing plants) and water in well. Apply 2 – 3 times per year for best results.
Lawns:	Before laying new lawn, spread a 3 – 5 mm layer of Life Force® Carbon™ over the area. For maintenance applications, spread a fine layer over lawn (a 30 L bag should cover around 60 – 100 m ²). Apply 2 – 3 times per year for best results.
Planting New Trees:	1 – 2 cups per tree in the hole.
Established Trees:	Spread a 2 – 3 mm layer of Life Force® Carbon™ under the dripline. Apply 2 – 3 times per year for best results.
Compost Heaps	Life Force® Carbon™ can be added to compost to accelerate the process and improve compost quality. Add one 30 L bag of Life Force® Carbon™ per cubic metre of compost material at the beginning of the composting process.
Potting Mix	Blend 1 part of Life Force® Carbon™ with 20 – 25 parts of potting mix.
Turf Top Dress	Mix 1 – 5% of Life Force® Carbon™ with top dress

Storage & Handling: Store in a cool, dry place. Refer to label before use.

HEALTH WARNING: THIS PRODUCT CONTAINS MICROORGANISMS

AVOID BREATHING DUST OR MISTS – WEAR PARTICULATE MASK IF DUSTY

WEAR GLOVES AND KEEP PRODUCT MOIST WHEN HANDLING

WASH HANDS IMMEDIATELY AFTER USE - READ DETAILED WARNING LABEL ON BAG
