

AI Summer Camp *for Youth*

Empowering the next generation with real AI skills — not just awareness.

Ages 10–17

In-Person | Virtual | Hybrid

Half-Day, Full-Day & Multi-Week

Customizable Curriculum

WHY THIS CAMP

AI is already reshaping every industry your students will enter. But most kids have never had a structured, confidence-building introduction to what AI actually is — or how to use it responsibly.

AI Summer Camp changes that. We give young people the foundation, the hands-on experience, and the mindset to move into an AI-powered future as creators — not just consumers.

WHAT STUDENTS BUILD

- **AI Literacy Foundation**
Plain-language understanding of what AI is, how it works, and what it isn't.
- **Prompting Skills**
Real practice writing effective prompts that produce useful, creative results.
- **AI in Real Careers**
How AI shows up in healthcare, gaming, music, business, and more.
- **Ethics & Responsibility**
Bias, privacy, and being a responsible digital citizen.
- **A Portfolio Project**
Every student completes a guided project they can show off.

WHO LEADS THE CAMP

Programs are led and designed by Karen Duroseau — CEO of AI Solutions & Services, certified AI consultant, 30-year clinical executive, U.S. Army & Air Force Reserve veteran, and Amazon bestselling author.

Her tagline says it best: From Service to Strategy. That's exactly the energy she brings to every young person in the room.

CAMP CURRICULUM — 5 MODULES

- 01 What Is AI, Really?**
Demystifying AI from the ground up. No jargon, no fear.
- 02 Prompting Like a Pro**
Write prompts that actually produce useful results.
- 03 AI in the Real World**
Careers and industries where AI is already at work.
- 04 Ethics & Responsibility**
Bias, privacy, and responsible digital citizenship.
- 05 Build Your AI Project**
Guided project: a portfolio piece they actually made.

PROGRAM OPTIONS
