Finance & Accounting Solutions for Private Equity

Portfolio Finance Functions Under Pressure

PE-backed companies often have strong growth plans but finance teams that are already operating at capacity. RHI helps close the execution gap with experienced, flexible resources.

01	02	03	04
Speed after close	Reporting gaps	Talent shortages	Complex transactions
The first 90–180 days require fast finance execution while hiring can take months.	Portfolio CFOs need audit prep, FP&A buildouts, management reporting and investor-ready packages.	Senior accounting and finance talent is scarce; permanent hires are not always right for project work.	Carve-outs, integrations, ERP transitions and add-ons require specialized skills.

RHI helps close the execution gap when portfolio finance teams need additional capacity, specialized expertise, or experienced leadership.

Where RHI Supports the Investment Lifecycle

PRE-CLOSE

Due diligence support
Financial reporting review
Finance resource planning

DAY 1–100

Close cadence
Interim leadership
Reporting rhythm

INTEGRATE

Purchase accounting
GL / ERP alignment
Transition services support

SCALE

FP&A buildout
Process improvement
Systems support

TRANSACTION READY

Audit support
Reporting cleanup
Buyer-ready financials

The goal is to help portfolio companies move faster without overwhelming lean finance teams — while building processes and reporting discipline that remain after the engagement.
