Demo Stage Ave Return

Month 1 average return = 1.11%

Early excitement and fresh setups often lead to solid first-month numbers. Traders are applying what they've just learned in a low-pressure environment, so discipline tends to hold up.

Month 2 average return = 1.05%

Slight dip is typical: traders start experimenting or stretching risk once they feel comfortable.

Month 3 average return = 1.24%

After testing limits in month 2, many settle into consistent routines and improve position sizing.

Live Stage Ave Return

Month 1 average return = -0.38%

First exposure to real capital likely triggers psychology changes: hesitation, premature exits, or over-correction.

Month 2 average return = 0.92%

Most traders begin to regain rhythm and confidence. Improved execution and adherence to rules bring the group back to positive territory.

Month 3 average return = 2.09%

Strongest growth as experience compounds. Traders who survived the first two months typically have better risk control and filter out early mistakes.
