

MOBILE MEDMESSAGE
GENTLE. INTENTIONAL. PROFESSIONAL.

Skyler Evans.

OPERATIONS · LOGISTICS

ENTERPRISE TECHNOLOGY · HEALTHY HOUR™ OPERATIONS · MOBILE WELLNESS SUITE LOGISTICS

Behind every Mobile MedMassage experience is a quiet amount of coordination: a therapist matched to the right location, a Wellness Suite parked where a guest can actually reach it, a confirmation that arrives before anyone has to wonder. That work is Skyler's.

He comes to it from both sides of operations — enterprise technology, where systems either hold up under pressure or they don't, and field operations, where plans meet real buildings, real timelines, and real people.

Mobile MedMassage asks for both. Care that promises to be gentle and unhurried has to arrive that way first.

What Skyler Handles

SCOPE OF WORK

Enterprise Technology

Skyler builds and maintains the technology that carries a relationship from first inquiry through follow-up, so nothing depends on someone remembering.

Healthy Hour™ Operations

For organizations hosting Healthy Hour™ Chair Massage, he handles the planning an HR team would otherwise absorb: therapist staffing, space and flow, timing across shifts, and the small decisions that determine whether an hour feels restorative or rushed.

Mobile Wellness Suite Logistics

For individuals and families, he manages the ADA-accessible Mobile Wellness Suite — transport, setup, access, and the readiness of the space before the door opens.

Guests rarely see any of it, which is the point. When the logistics are handled well, what's left is the care.
