How to send *your stems*

Five to ten minutes of prep. **The file names matter most.**

Three rules

Files that break these come back to you to fix.

THE WHOLE SONG

6 minutes at most: the whole song, start to finish. Every file covers all of it.

SAME START, SAME LENGTH

Every file starts and ends at **exactly the same point**, even one that's silent for part of it.

DRY VOCALS, CLEAN MASTER

Print your tuning, then **no effects on vocals** and nothing on your master bus.

Name your files like this

WAV files, named exactly as shown. Skip any you don't have.

VOCALS

LEAD	Your main vocal
LEAD 2	A double or second lead
BVS	Every background vocal
ADLIBS	Every ad lib

YOUR MIX

MY MIX	Your own mix of the song, however rough. It plays for the first 30 seconds, then mine takes over

THE BEAT: ONE FILE OR ITS STEMS

BEAT	The whole beat on one file

OR, NEVER BOTH

DRUMS	Kick, snare and claps
PERC	Hats, shakers, percussion
BASS	Bass and 808
MUSIC	Keys, guitars, synths

NO ACCESS TO STEMS?

Send your whole song **as one file** and tick **"I want it mastered"**. I'll master it instead of mixing it.

Send them here
