

Adia

ZERO DISRUPTION  **TOTAL COMFORT**  **UPGRADE** AS YOU GO

- With Adia, homeowners can get a heat pump installed **without** changing **radiators** or **pipework** upfront.
- With smart tariffs, 90% of homes save on their energy bills.
- Adia keeps the home **comfortable** throughout with room-by-room temperature control, while getting the best **efficiency** possible from the existing heating system.

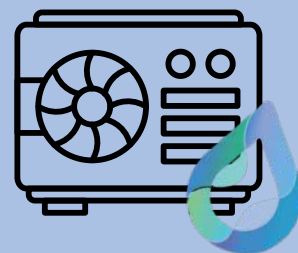

After the first winter, Adia uses real data from the home to show which radiators are limiting performance, and **how much could be saved** by upgrading only what's worth upgrading.

Homeowners using Adia typically replace **less than half as many radiators on average!**

1

Step 1
(Today)

- Get a heat pump installed with **Adia**.

2

Step 2
(Later, whenever it suits you)

- Make only the changes that make sense for **your home**.
- Upgrades on your terms. Based on **real data**.

See how it works!
