SECURITY ALARM CABLE
22 AWG | 2-12 Conductors | Unshielded | FT4

Security Cable

Product Description

Multi-conductor security alarm cable designed for low-voltage security and alarm system wiring. Available in 22 AWG constructions from 2 to 12 conductors with an unshielded design.

Product Specifications

Property	Specification
Product Type	Security Alarm Cable
Conductor Size	22 AWG
Number of Conductors	2-12 Conductors
Shielding	Unshielded
Flame Rating	FT4
Reference Standards	CSA C22.2 No. 214 / UL 444

Typical Applications

Application	Typical Use
Security Alarm Systems	Low-voltage security and alarm wiring
Burglar Alarm Systems	Alarm control and detection circuits
Sensors & Contacts	Door/window contacts and compatible sensors
Control & Signaling	Low-voltage control and signaling circuits

Available Configuration

22 AWG, 2C through 12C, unshielded construction.

Note: This specification is based only on the supplied product information. Conductor stranding, insulation/jacket materials, voltage rating, temperature rating, dimensions and other values were not provided and are not assumed.
