Step 14

The smart automation can be activated or deactivated with a click of a button

Reset

If you are having trouble connecting to the siren you may need to do a reset.

How to reset the siren?

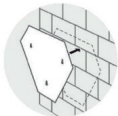

Hold down the learn button on the back of the siren for up to 15 seconds until you hear it beep and the LED is flashing red.

Installation

To install the outdoor siren, see steps below:

1. Use a piece of paper to create a screw template for the siren and mark the correct screw positions onto the wall.

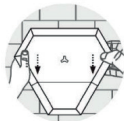

2. Using the screw template, drill the screws into the wall.

3. Connect the siren to a main power supply using the charging adapter provided.

4. Finish mounting by fixing the siren on to the screws and position into place.
