### Natural Medicine Center Cancellation Policies and Fees

Your appointment is reserved especially for you. We value your health and your business and ask that you honor the office's scheduling policies. We recognize that the time of our patients and staff is valuable and have implemented this policy to benefit everybody. When you miss an appointment with us, you not only sacrifice your own health progress, but it creates a gap in the schedule that another patient could have utilized, had we known in advance.

A credit card is required to hold your appointment. Should you need to cancel or reschedule, please notify us at least 24 hours in advance for chiropractic, and 48 hours in advance for nutrition/testing appointments. The cancellation fee is \$125 for new patient testing. The fee for all other services is equal to half the cost of the scheduled service. This amount will be charged to the card provided if cancellations are not made in the time frame listed above. We understand that life emergencies and situations beyond your control arise and will take that into consideration if you're unable to keep the appointment that was reserved for you.

Your cooperation and understanding are greatly appreciated and will help us to be able to serve the needs of our patients more effectively.

### **Informed Consent for Chiropractic, Nutrition, and Acupuncture**

**The nature of Chiropractic treatment:** The doctor will use his/her hands or a mechanical device to move your joints in a very specific way. You may feel a “click” or “pop” and you may feel movement of the joint. This is normal, but does not always occur with every adjustment.

**The nature of Acupuncture treatment:** The doctor may also use acupuncture as an adjunct, or in whole, during your care. Acupuncture involves the insertion of tiny needles into the body through the skin. It may also involve the use of pressure or electrical stimulation separately, or in conjunction with needling.

**The nature of Nutrition treatment:** The doctor may also advocate the use of specific nutrients during your care. This involves the prescription of brand name individual or combination products. Rest assured that the Natural Medicine Center uses only the highest quality products. Possible risks as with all health care, complications are possible following a chiropractic, acupuncture, and nutrition therapy.

---Chiropractic complications could include fractures of bone, muscular strain, ligamentous sprain, dislocation of joints, or injury to intervertebral discs, nerves, or spinal cord. Cerebrovascular injury or stroke could occur upon severe injury to arteries of the neck. These complications are extremely rare occurrences. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritation, burns or minor complications.

---Acupuncture complications include infection at the needling site, organ perforation, bleeding, and pneumothorax. The style of acupuncture used at Natural Medicine Center is typically more superficial lessening the possibility of complications.

---Nutritional complications include the risk of adverse nutrient-reactions and hypersensitivity. Nutrients are in general well tolerated, however as with any medication, if any adverse symptoms occur with nutrient use, discontinue immediately and consult you treating doctor.

The risks of complications due to Chiropractic treatment have been described as "rare". The risk of cerebrovascular injury or stroke, has been estimated at one in one million to one in twenty million, and can be even further reduced by screening procedures. It is safer to get adjusted than it was to get in your car and drive to our clinic! The probability of adverse reaction due to acupuncture and nutrient therapy are also considered "rare". They would be significantly less than the chance of adverse complications due to prescription medication use or surgery.

**Risks of remaining untreated:**

Delay of treatment allows formation of adhesions, scar tissue, and other degenerative changes. These changes can further reduce skeletal mobility, and induce chronic pain cycles. It is quite possible that delay of treatment will complicate the condition and make further rehabilitation more difficult. Delaying treatment of nutrient therapy can lead to a variety of chronic diseases such as diabetes, heart disease, cancer, stroke, death etc.

**Unusual risks:**

I have had any unusual risks of my case explained to me. I have read the explanation above of Chiropractic, nutrition, and acupuncture treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment and understand that no guarantees of outcome have been made. I have also disclosed all medical information to the doctor.

By signing this document, I have freely decided to undergo the recommended treatment, and hereby give my full consent for treatment. I accept the risks and release Dr. Rakowski/Romportl of any liability for any injury or loss directly related to care I have received at this clinic.

**Authorization to Release Information**

**I HEREBY AUTHORIZE THE NATURAL MEDICINE CENTER OR HIS BILLING AGENT TO RELEASE ANY INFORMATION ACQUIRED IN THE COURSE OF MY DIAGNOSIS OR TREATMENT TO MY INSURANCE COMPANY OR PERSONS REPRESENTING MY CASE.**

#### OVERALL SCORE TABULATION

Recommended protocols based on new detoxification questionnaire (MSQ and XTT) MSQ SCORE _____ (High >50; moderate 15-49; Low <14) XTT SCORE _____ (High >10; moderate 5-9; Low <4)					
MSQ Score	XTT Score	Description	Functional Medicine Protocol		
			Medical Food	Diet	Additional Nutraceutical Support
50 or >	10 or >	High level of general symptoms and indicated symptoms of elevated toxic load	Medical food for imbalanced detoxifiers	28-day elimination diet	Bifunctional, antioxidant, and chlorophyllin nutraceuticals
15-49	5-9	Moderate level of general symptoms with moderate symptoms of toxic load	Medical food for imbalanced detoxifiers	10-day elimination diet	Consider bifunctional, antioxidant, and chlorophyllin nutraceuticals
14 or <	4 or <	Low level of general symptoms and minimal indicators of toxic load			Maintenance
Additional Symptom-Specific Support					
Symptom			Nutraceutical Support		
Water retention and/or frequent or urgent urination			Kidney support nutraceuticals		
Heartburn and/or intestinal/stomach pain			Functional dyspepsia nutraceuticals		
Diarrhea, constipation, and/or intestinal/stomach pain			Probiotics		

**Note:** Patients with high MSQ but low XTT may be exhibiting pathology that is not related to toxic load. Other mechanisms should be considered such as inflammation/immune/allergic gastrointestinal dysfunction, oxidative stress, hormonal/neurotransmitter dysfunction, nutritional depletion, and/or mind body. Individualize support with specific medical foods, diet, and/or nutraceuticals.

# Identi-T™ Stress Assessment

Name \_\_\_\_\_ Age \_\_\_\_\_ Sex \_\_\_\_\_ Date \_\_\_\_\_

Stress is a normal part of life. Every day, we're faced with stimuli, called stressors, which can elicit the body's "fight or flight" response, setting off a cascade of physiological reactions and resulting in emotions ranging from mild to intense. But while occasional stress is natural and even healthy, chronic or acute stress can be harmful.

Please take a few moments to discover your body's response to situations you perceive as stressful. By honestly assessing how you feel, your healthcare provider can create a natural stress relief program for your individual needs.

**Directions:**

Please read each statement and circle the number 0, 1, 2, or 3 that best describes your feelings or reactions throughout the course of the day. Determine the subtotal score for each section, then determine the total scores for sections A-C and C-E. Some questions may appear redundant between sections. There's a reason for each question. Don't spend much time on any one question.

0 = Never true    1 = Seldom true    2 = Sometimes true    3 = Often true
