Here's your headline. The full picture — what each signal means and the exact order to work on them — comes in your Tech Success Roadmap and your debrief.

What this report is for — and what it is not

This report is a development tool. It describes how you tend to operate right now — not your worth, your potential, or your IQ. Scores move over time. Moving them is the whole point.

Because of that, the EQFIT® Edge™ assessments are not to be used to make personnel decisions. They are not selection instruments or promotion instruments. They are research-based, for growth and development purposes. Results should not be used to decide who gets hired, promoted, retained, reassigned, compensated, or let go.

If you are a leader holding someone else's report, treat it as confidential and as a conversation starter, not a verdict on that person. Work with them and with the report, and grow them through the process as it is intended.

Your EQFIT® AI Readiness Edge™ Assessment: 51.1% — Building

You: 51.1%
