

CAPABILITY STATEMENT

Closing The Information Gap™ Before Professional Responders Arrive

SBA Certified Service-Disabled Veteran-Owned Small Business (SDVOSB)

COMPANY OVERVIEW

Scan If Hurt™ is an emergency preparedness platform that helps close The Information Gap™ by making critical emergency information available when an individual cannot communicate for themselves.

Emergencies begin with a First Helper — a family member, coworker, teacher, coach, bystander, or Good Samaritan — who recognizes the emergency, calls 911, and begins assisting the individual before professional responders arrive. Scan If Hurt™ supports First Helpers, 911 dispatchers, first responders, healthcare professionals, caregivers, and others by making critical emergency information available when it matters most.

CORE COMPETENCIES

- Emergency Preparedness Technology
- Emergency Information Management
- First Helper & Good Samaritan Support
- Public Safety Technology
- Workplace Safety Solutions
- Emergency Contact Management
- Medical Information Accessibility
