

OUTREACH, PUBLISHING & VISIBILITY

REACH + SOCIAL

Reach your market. Give people something worth discovering when they look for you.

€179 / month

Per 100-company campaign
Excl. VAT where applicable

Give curiosity somewhere to land.

Managed outreach, thoughtful social content and useful website articles, working together.

The outreach foundation

Includes targeted company research, your prospect database, campaign strategy, an approved email sequence, managed nurturing, reply monitoring and positive opportunity handover.

The same clear targeting

One prospect means one unique company. Each 100-company unit uses one country and one niche or business type. Your team handles the continuing sales conversation, negotiation and closing.

Your monthly content

- Up to 30 planned social content pieces.
- Four useful website articles.
- Approval before publishing.
- Outreach, social activity and available search/content reporting.

One allowance per business

Social content and Search & AI Visibility allowances apply at client-company level. They do not increase when you add more companies to the outreach campaign.

A presence with something to say.

Your experience, your preferences and your business knowledge give the content its direction.

Up to 30 pieces per month

This means 30 planned content pieces in total, not 30 different posts for every platform. Content can be adapted or reused appropriately across connected channels.

What we can create

Useful tips, lessons, brand stories, product information, facts, educational posts, text-led posts, carousels and promotional content. Captions and hashtags can be included.

Standard platforms

Instagram · Facebook · Threads · LinkedIn · TikTok. A platform outside this list may need separate review or setup.

Share what you know

Send natural notes in a Word document or a simple WhatsApp message, including in a regional language. Customer questions, practical methods, recipes, common mistakes and lessons from experience can all be useful starting points.

Review before publishing

The planned monthly content is shown to you for approval.

Additional work

More than 30 monthly posts requires discussion and quotation approval. Video production, video scripting, full DM/comment customer service and paid advertising are not standard features.

Your knowledge becomes something others can discover.

Useful answers have lasting value.

Four website articles each month, built around subjects that matter to your customers.

What the articles cover

Buyer questions, problems, solutions, practical methods, lessons, local considerations and genuine business experience.

Search, in plain language

Clear titles, headings, useful information, internal links and suitable metadata may be used to help search engines understand your content.

You supply the experience

You do not need to write finished articles. Share one or several observations during the month. Up to four strong ideas are helpful; rough notes are enough.

External links

A backlink is a link from another website to yours. Active backlink acquisition, sponsored placements and paid publisher articles are not included as standard.

Additional articles

€5 per additional article.

A long-term approach

Search and AI visibility are long-term discoverability work. Rankings, traffic and AI recommendations are not guaranteed. Required external costs are confirmed separately.

Agree the direction. Then go live.

Your email sequence, planned social content and website/article content are approved before publishing.

The process

- Confirm your market, offer, channels, brand direction and website access.
- Approve the campaign and content plans.
- Launch the approved service.
- Review outreach, social activity and available content indicators.

30-day live trial

Setup, configuration, content preparation, testing and approvals happen before Day 1. The clock begins when the actual service is live.

After the trial

If you continue after the trial, choose a 6-month or 12-month agreement. Long-term cancellation requires one month's prior notice. Post-trial activation or setup is quoted according to the actual requirements and complexity.

Website support

If needed, a standard business website can be prepared before the trial. You buy and own the domain. For continuing managed clients, the standard website can remain included with minor standard updates. Major redesign, e-commerce and specialist development may be quoted separately.

If you do not continue

If you do not continue after the trial, €200 retains the Tmprary-built standard website/layout. Otherwise, the created layout may be removed. Your domain remains yours.

Outcomes

No sales, reply, ranking or traffic outcome is guaranteed.

Thoughtful work, clearly defined.

€179/month per 100-company campaign. Excl. VAT where applicable.

Included each month

- The REACH managed outreach service
- Up to 30 planned social pieces in total
- Four useful website articles
- Client approval and standard publishing
- Reporting and reasonable recommendations

The client's role

Share useful knowledge, keep business information current, approve planned work and handle sales conversations after interested prospects reply.

Outside standard scope

- Full DM or comment customer service
- Video production and video scripting
- Paid advertising and boosting costs
- Advanced technical SEO
- Active backlink acquisition and paid placements
- E-commerce or complex custom website features
- Full sales negotiation and closing

External costs

Domains, external platforms, paid media, publisher placements and other outside services may carry separate costs, confirmed where relevant.
