

Program Agreement

City of Miramar AI Boot Camp · Summer 2026

This is a straightforward working agreement in everyday language, not a dense legal contract. It reflects what we discussed and agreed. Either party can attach it to its standard paperwork.

1 The parties

This agreement is between two partners working together on one program.

MetAiBlock (the provider)	Designs and delivers the AI Boot Camp. MetAiBlock delivers with qualified certified instructors it sources and trains.
City of Miramar (the host and partner)	Hosts the program, provides the facility and equipment, and handles recruitment and registration.

2 The program

A one-week AI Boot Camp for teens. Small group, hands-on, project-based.

Ages	13 to 15
Group size	Up to 15 students
Ideal dates	Monday to Friday, July 27–31, 2026
Backup dates	Monday to Friday, August 3–7, 2026
Daily hours	9:00am to 3:00pm
Location	A City of Miramar facility

What students create and take home:

- ✓ A themed song, gathered into a class album
- ✓ A collaborative digital comic book (available to print or order)
- ✓ A video that brings the story to life
- ✓ An end-of-week showcase for parents and guests

Each student leaves with their own copy of the creations they helped build.

3 What MetAiBlock provides

- ✓ The full curriculum and all learning materials
- ✓ Two Broward-certified STEAM teachers, background-checked, trained, and paid by MetAiBlock
- ✓ All AI tool subscriptions used in the program
- ✓ Program delivery and daily on-site oversight
- ✓ The end-of-week showcase
- ✓ Each student's final package of finished work

Safety framework

- ✓ Level 2 (FDLE + FBI) background-checked staff
- ✓ Small-group supervision throughout the day
- ✓ Restricted tools operated only by instructors
- ✓ Content moderation and responsible AI use taught

4 What the City provides

- ✓ The facility (the camp space)
- ✓ 17 computers plus projector, screen, and speakers
- ✓ Internet access and on-site IT support
- ✓ Marketing and recruitment for the program
- ✓ Student registration and intake
- ✓ Student food (breakfast and snack)
- ✓ The program fee, described in Section 5

5 Fees & payment

\$14,000 total program fee

Funded by the sponsor. No hidden fees.

The sponsor provides \$15,000 in total. The City keeps \$1,000 of that for student food. The remaining \$14,000 is the MetAiBlock program fee.

DEPOSIT (50%)

\$7,000

Due Friday, July 17. Paid by check that MetAiBlock will pick up, to keep the timeline moving.

BALANCE (50%)

\$7,000

Due upon completion of the program.

These are the only charges. There are no hidden fees.

6 Timing depends on the deposit

The schedule holds together around the July 17 deposit. That deposit lets us lock the pieces before the start date.

Fri, July 17	50% deposit paid (check pickup). This step gates everything after it.
Wed–Fri, July 22–24	Teacher training at the facility, with equipment tested.
Mon, July 27	Camp begins.

If the deposit or the logistics are not met by these dates, the parties move to the backup week (August 3–7) or another date both sides agree on.

7 Intellectual property

MetAiBlock owns

The curriculum, teaching methods, and program materials. The City receives a limited license to run this program while the two are engaged together.

Students own

The works they create in the camp. The City and MetAiBlock may showcase and promote those works, with signed parental consent.

8 Media & privacy

- ✓ Recordings and photos support the video deliverable, the showcase, and promotion.
- ✓ All media use is subject to signed parental consent.
- ✓ Student data is handled responsibly.
- ✓ Student tool accounts are managed by the program, not created independently by students.

9 Safety & conduct

- ✓ Certified, background-checked staff supervise students throughout.
- ✓ Staff follow mandatory-reporter requirements.
- ✓ A student code of conduct sets clear expectations.
- ✓ Instructors sign an NDA and a non-compete covering the curriculum.

10 If plans change

We keep this fair, with one goal: everyone receives the value they are due.

- ✓ Once MetAiBlock has built the curriculum, the deposit is non-refundable.
- ✓ If plans change, both parties will make good-faith efforts to preserve that value by applying it to a future program they agree on together, so the work already done is not lost.
- ✓ If the City cannot meet the requirements after MetAiBlock has already incurred costs and built the training, those incurred costs are deducted from the deposit, and any remaining balance is returned to the City.

11 This is a pilot

This one-time civic-rate engagement is not a baseline for future pricing. Both sides intend to explore future programs together, such as a fall after-school program, a winter camp, and resident and staff AI training, each under a separate agreement.
