

# **The 33 Chiropractic Principles**

## **Re-contextualized by Claude Lessard, D.C.**

### **UNIVERSAL PRINCIPLES**

#### **No. 1. The Major Premise**

A universal principle of organization is continually supplying properties and action to all energy/matter, thus maintaining it in existence.

#### **No. 2. The Chiropractic Meaning of Existence**

The expression of this organizing principle through energy/matter is the chiropractic meaning of existence.

#### **No. 3. The Union of the Principle of Organization and Energy/Matter**

Existence is necessarily the union of the universal principle of organization and energy/matter.

#### **No. 4. The Triune of Existence**

Existence is a triunity having three necessary united factors, namely, the principle of organization, information/force and energy/matter.

#### **No. 5. The Perfection of the Triune**

In order to have existence, there must be 100%/perfect organizing principle, 100%/perfect information/force and 100%/perfect energy/matter.

#### **No. 6. The Principle of Time**

All processes require time and space.

#### **No. 7. The Perfection of the Organizing Principle in Energy/Matter**

The perfection of the organizing principle for any particle of energy/matter is always 100%/perfect and complete.

#### **No. 8. The Function of the Principle of Organization**

The function of the principle of organization is to organize information/force.

#### **No. 9. The Amount of Information/Force**

The information/force organized by the principle of organization is always 100%/perfect.

#### **No. 10. The Function of Information/Force**

The function of information/force is to unite the principle of organization and energy/matter.

**No. 11. The Character of Universal Information/Force**

The information/force of the universal principle of organization is manifested by physical laws; is unswerving and unadapted, and have no solicitude for the structures in which it works.

**No. 12. Interference with Universal Information/Force**

There can be interference with the transmission of universal information/force.

**No. 13. The Function of Energy/Matter**

The function of energy/matter is to express information/force.

**No. 14. Existence**

Information/force is manifested by motion in all energy/matter; all energy/matter has motion, therefore all energy/matter has existence.

**No. 15. No Motion without Instructive Information/Force**

Energy/matter can have no motion without instructive information/force supplied by the principle of organization.

**No. 16. Organization in both Organic and Inorganic Energy/Matter**

The principle of organization governs both organic and inorganic energy/matter.

**No. 17. Cause and Effect**

Every effect has a cause and every cause has effects.

**No. 18. Evidence of Life**

The signs of life are evidence of the adaptive organization of life.

**No. 19. Organic Energy/Matter**

The material of the body of a living thing is organic energy/matter.

## **INNATE PRINCIPLES**

**No. 20. Innate Law of Living Things and the Tetrad of Life**

- a. A living thing exhibits an inborn adapting principle, called the innate law of living things, which is an essential factor, governing its body,
- b. and the body of a living thing is a tetrad which combines functions of four necessary united factors, namely, the principle of organization, information/F, E/matter, and the innate law of living things.

**No. 21. The Purpose of the Innate Law of Living Things**

The purpose of the innate law of living things is to maintain the material of the body of a living thing alive.

**No. 22. The Quality of the Innate Law of Living Things**

The innate law of living things is always 100%/perfect for all living energy/matter.

**No. 23. The Function of the Innate Law of Living Things**

The function of the innate law of living things is to adapt universal information/force and energy/matter for use in the body, so that all parts of the body will have coordinated action for mutual benefit.

**No. 24. The Limits of Adaptation**

The innate law of living things adapts information/force for the body only if it is possible according to universal laws.

**No. 25. The Character of Innate Information/Force**

The information/force of the innate law of living things never injures or deconstructs the structures in which it works.

**No. 26. Comparison of Universal Information/Force and Innate Information/Force**

In order to carry on the universal cycle of life, universal information/force is deconstructive, and innate information/force is reconstructive, regarding structural energy/matter.

**No. 27. The Normality of the Innate Law of Living Things**

The innate law of living things is always normal and its function is always normal.

**No. 28. The Conductors of Innate Information/Force**

The conducted information/force of the innate law of living things operates through or over the nervous system in animal bodies.

**No. 29. Interference with Transmission of Conducted Innate Information/Force**

There can be interference with the transmission of conducted innate information/force.

## **CHIROPRACTIC PRINCIPLES**

**No. 30. The Cause of DIS-EASE**

Interference with transmission of conducted innate information/force causes incoordination of DIS-EASE.

**No. 31. The Vertebral Subluxation and its Correction**

- a. The vertebral subluxation is the uniquely chiropractic entity as a cause of interference to the transmission of innate information/force,
- b. and the correction of a vertebral subluxation is always due to the process of adapting information/force by the innate law of living things.

**No. 32. The Principle of Coordination**

Coordination is the principle of coherent actions of all the parts of an organism in fulfilling their roles and purposes.

**No. 33. The Principle of Continuous Supply and Computation**

The principle of continuous supply and computation is existent in the body in its ideal state wherein the living body is the "computer," the innate law is the "normal software," the innate field is the "operating system," the brain is the "central processing unit," the brain cells are the "processors", and the nerve cells are the "transmitters."

The thirty-three principles of chiropractic basic science reveal with crystal clarity the exclusive chiropractic objective. The chiropractic objective is to locate, analyze, and facilitate the correction of vertebral subluxation for an innate-normal transmission of the conducted innate Information/Force of the body. Period.
