Sector experience

Office Fitouts

Max Knoll specializes in creating dynamic and inspiring office fitouts that positively impact staff well-being and align with clients' goals and vision. We manage projects from start to finish, including multi-storey offices and minor refurbishments, while ensuring compliance with workplace health and safety, PWD requirements, and Council regulations.

Medical Fitouts

We deliver functional and calming spaces for healthcare professionals and patients, with experience in front and back-of-house fitouts for medical and dental clinics, allied health facilities, and therapy centers in compliance with State and Council regulations. Services include fitouts for medical suites, procedure theatres, recovery rooms, laboratories, reception areas, treatment rooms, and secure file storage systems.

Retail Fitouts

We deliver retail fitouts that balance style and functionality to help businesses thrive, with a strong focus on hospitality and efficient back-of-house solutions, designed to attract foot traffic and meet shopper demands in competitive markets, across restaurants, bars, cafés, kiosks, beauty salons, retail stores, and fashion outlets.

Reburbishments

We provide comprehensive refurbishment and maintenance services to transform existing spaces without the need to relocate. We help businesses optimize functionality, create additional space, and improve aesthetics to boost staff productivity and morale. Our shopfitters specialize in various services, including carpentry, plastering, plumbing, tiling, electrical, glazing, painting, waterproofing, fire service, air-conditioning, and signage.
