

HN-400M

MULTIBEAM ECHOSOUNDER

► Highlights

The CHCNAV HN-400M multibeam echosounder gives hydrographic professionals a smarter, more reliable way to survey challenging waters. Built for conditions where turbidity, depth variation, and vessel motion can affect data quality, it combines intelligent dual-frequency operation, high-precision INS-based stabilization, and a lightweight integrated design. From offshore mapping and underwater inspection to channel dredging and inland waterway surveys, the HN-400M delivers high-quality bathymetric data with faster mobilization and dependable performance.
