THE 6-STEP FRAMEWORK 02

A LOOK AT THE LESSONS 03

INCLUSIONS + PRICING 06

Welcome!

Shape the Environment is one of the modules from *The Behaviour Reset*, my 6-step framework designed to help you understand children's behaviour, make informed decisions about how to support it, and adapt your approach when things don't go to plan.

This mini-course is all about understanding how to support behaviour proactively, by getting in front of the behaviour before it's even happened! I'm not just sharing a whole range of proactive strategies with you; I'm also helping you build your thinking BEHIND the strategies, so you can use them with intention in your everyday practice. Alongside the whole of the Shape the Environment module, you also have access to three carefully selected foundational lessons from Module One: Rethink Behaviour.

Like the full Behaviour Reset, this learning is grounded in a rights-affirming, neuro-affirming and trauma-informed approach, drawing on child development, neuroscience, lived experience, and current research and evidence.

If we haven't met before, I'm Danica (Dah-nee-cah), an early childhood educator, lecturer, mentor and consultant with 18 years of experience working alongside children, families and educators.

My strength lies in taking big, complex ideas about behaviour and translating them into practices educators can actually use - and because I'm still teaching young children myself, you can be sure I'm bringing you more than ideas that sound lovely on paper.

The 6-Step Framework

Shape the Environment is step 3 of The Behaviour Reset Framework - a 6-step, evidence-informed approach that walks you through a framework of behaviour support, so you can enter hard moments with greater clarity, steadiness, and confidence.

Module One

Rethink Behaviour

Your mindset

Module Two

Explore Child Development

Your understanding

Module Three

Shape the Environment

Proactive supports

Module Four

Engage with Compassion

Responsive supports

Module Five

Transform Through Reflection

Supporting accountability

Module Six

Thrive as a Community

Next steps

Module One

Rethink Behaviour

Module 1 lays the foundation for the entire course, focusing on unlearning traditional behaviour myths and reframing how we understand behaviour, discipline, and our role as educators. This is the reset before the rebuild.

I've carefully selected three lessons from this module. These lessons form the foundations for your behaviour support.

You have access to:

Submodule 1: Unlearning Behaviour Myths

Lesson Four: Children's Rights + Behaviour
Familiarise yourself with a rights-affirming lens for behaviour support.

Submodule 2: How We Show Up in the Behaviour Space

Lesson Three: The Beliefs + Values Beneath Our Responses
Explore how your personal beliefs, values, and experiences shape your interpretation and responses.

Lesson Four: Warm Authority + Confident Leadership
Reimagine warm authority as a balance of connection and clarity.

Module Three

Shape the Environment

Module 3 focuses on the proactive foundations that support behaviour. This module strengthens the conditions for behaviour success, reducing the need for reactive responses.

Submodule 1: The Foundations

Lesson One: The Environment + Behaviour
Explore how environments shape behaviour, as well as the unspoken conditions that shape behaviour before it happens.

Submodule 2: The Felt Environment

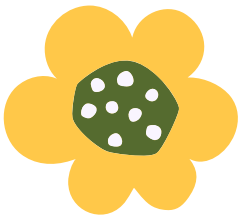

Lesson One: Felt Safety
Explore what felt safety is, how is supports behaviour, and the three pillars that build a child's sense of felt safety.

Lesson Two: Relational Safety + Belonging
Deep dive into how children experience relational safety through relationships, predictability, and presence, and reimagine belonging as a critical shaper of engagement, inclusion, and regulation.

Lesson Three: Time + Temporality: Towards a Slow Pedagogy
Consider pace, transitions, and urgency as behavioural influences, recognising how time pressure impacts regulation and capacity.

Lesson Four: Neuro-Inclusive Practice
Guest workshop - Kim Howard of Creativity + Beyond OT
Examine how neurodiversity-affirming environments support regulation, participation, dignity, and inclusion.

Lesson Five: The Sensory Environment
Unpack how sensory input, overload, and sensory needs shape behaviour and participation throughout the day.

Submodule 3: The Strategies

This sub-module introduces a range of proactive strategies designed to support behaviour. These strategies work best when they sit on top of strong conditions for behaviour and a supportive felt environment.

- Routines + Rituals
- Pre-corrections
- Personal Narratives
- Movement + Movement Breaks
- Collaborative Group Agreements + Rules
- Supportive Transitions
- Visual Supports
- Calm Corners + Rest-full Spaces
- Skill Building
- Opportunities to Respond

Inclusions + Pricing

Inclusions

- A library of bite-sized video lessons (4 hours of content)
- An accompanying Module Workbook to record your reflections
- A comprehensive library of proactive behaviour support strategies
- Access to the private community, *The Behaviour Reset Crew*
- Ongoing access to the mini course content
- Two mini guides make it easier to translate ideas into practice:
  - When Mat Times Just Aren't Working: a guide packed with ideas for engaging mat sessions
  - The Up/Down Regulation Toolkit: a toolkit filled with regulation strategies to use with your group

Pricing for Individual Access
A$97 (incl. GST) | US$69

A one-time investment in Shape the Environment, a standalone mini-course from The Behaviour Reset. Perfect for educators who want to strengthen one specific area of behaviour support, with practical learning they can work through at their own pace.

What if you want to join the full Behaviour Reset later?
Every dollar you've invested into the mini-course goes towards the full course! 🥳

A discount code will be shared upon purchase to receive A$97 off your enrolment in the full course.

Purchased two or all three? I'll credit those too! Just email me so we can arrange this: hello@littlebloomconsultancy.com.au

This way, you can start with the learning you need now and explore the complete six-part framework when you're ready.
