

# **Lumovex Media Group and BlackForge Distribution Form Strategic Alliance to Produce and Distribute 18 AI Micro-drama Series a Year**

*First U.S.-based Hollywood-led AI micro-drama pipeline delivers premium short-form storytelling as a creative counterpoint to offshore and fully automated AI production*

**LOS ANGELES, June 19, 2026 /PRNewswire/** -- Lumovex Media Group, one of the first U.S.-based AI micro-drama and media production companies, today announced a strategic alliance with BlackForge Distribution to produce and distribute 18 premium AI micro-drama series in the first year of the partnership, with production beginning this month. The alliance creates a vertically integrated production-to-distribution pipeline designed to control intellectual property (IP) ownership and protect long-term asset valuations in the rapidly expanding short-form streaming market.

BlackForge Distribution operates alongside its production arm, BlackForge Partners, forming a fully integrated pipeline from development through worldwide release. The combined infrastructure gives the partnership end-to-end control of premium, serialized, high-concept micro-dramas built for global scalability across mobile-first audiences.

“Our mission is to craft premium short-form stories using AI as a tool, not a replacement, while maintaining a strong human creative core,” said Kerri Zane, Co-founder of Lumovex Media Group. “We are working exclusively with notable U.S.-based Hollywood writers, voice actors, directors, and producers, positioning Lumovex as a counterpoint to the offshore and fully automated AI content pipelines currently flooding the space.” Said Steven Diamond - Co-Founder of Lumovex.

The alliance answers surging global demand for vertical, mobile-first micro-drama content, a category projected to be among the fastest-growing segments of streaming entertainment. By pairing Lumovex’s Hollywood creative network with BlackForge’s vertically integrated production and distribution infrastructure, the partnership aims to set a new quality benchmark for AI-assisted short-form storytelling.

“AI micro-dramas represent the next chapter of mobile entertainment, and the leaders in this category will be the companies that pair cutting-edge technology with proven creative talent,” said John Lewis, Founder of BlackForge Distribution. “Our alliance with Lumovex is built around IP ownership, talent integrity, and premium content quality, the three pillars of long-term asset value in this market.”

## **About Lumovex Media Group**

Lumovex Media Group is one of the first U.S.-based AI micro-drama and media production companies, crafting premium short-form stories with a Hollywood-led creative core. The company collaborates exclusively with notable U.S.-based writers, voice actors, directors, and producers to deliver serialized AI-assisted content that prioritizes craft over automation.

## **About BlackForge Distribution**

BlackForge Distribution operates alongside its production arm, BlackForge Partners, forming a vertically integrated pipeline that controls IP and long-term asset valuations across premium, mobile-first micro-drama programming built for global scalability.
