

K L I M B O

HELPS YOUR KIDS WASH THEIR HANDS

KLIMBO-STAIR, the removable and versatile step stool of the Klimbo product line, responds to children's need for independence by allowing them to easily reach the lavatories and hand dryers in public restrooms as well as other accessories that are difficult to reach because of their small size.

Affordable, mobile and light, Klimbo-Stair caters to the needs of young families and promotes healthy hygiene.

Klimbo-Stair can be conveniently stored under surfaces and easily moved as needed. Its wide, non-slip surfaces make it the ideal auxiliary step stool for commercial and institutional applications.
