Directed Claude & Rive Share Link

After placing the video in the prompt box, I directed Claude to “Create this About Us button. It is a black and white pill-shaped button. I want you to recreate the button so it looks and acts the same when hovered in a web page. I want to place the button in a code embed on a website page.”

On the Rive platform, one of the export options is a Share Link. I had earlier created a share link of this button, so I gave Claude the link:

https://rive.app/s/20KVFnO9SUO0ncWEysEL5w/?runtime=rive-renderer
