

# EQUIPPING WARRIORS IN HARM'S WAY

## Hand Entry Access Tool Kit

The EOD Gear Hand Entry Access Tool Kit is designed to support Explosive Ordnance Disposal (EOD) technicians, bomb squads, and tactical operators conducting manual access and investigative entry operations involving suspected explosive hazards. The kit provides operators with the tools required to carefully open, manipulate, and inspect suspicious containers, packages, or devices when remote handling techniques are not feasible.

This kit contains the essential tools required to conduct controlled hand-entry operations, enabling operators to access devices while minimizing disturbance to potential firing mechanisms and preserving evidence for investigative purposes. Tools support cutting, prying, probing, detection, and stabilization tasks encountered during render-safe procedures and post-incident investigations.

All kits are assembled by EOD Gear under an ISO 9001:2015-certified Quality Management System to ensure consistent configuration and operational reliability. The Hand Entry Access Tool Kit is available for procurement through the EOD Gear GSA Schedule.

Kits are supplied in durable tactical pack configurations suitable for operational deployment. Configuration modifications and agency-specific kit configurations are available upon request.
