

EQUIPPING WARRIORS IN HARM'S WAY

Master First Line EOD Tool Kit

The EOD Gear Master First Line EOD Tool Kit is designed to support explosive ordnance disposal (EOD) technicians, bomb squads, and tactical operators conducting initial investigative and access operations involving suspected explosive hazards. The kit provides operators with the essential tools required to inspect, probe, manipulate, and access suspicious packages, containers, or devices encountered during explosive hazard response operations.

The Master First Line configuration expands upon a standard first line tool set by incorporating additional tools that support device inspection, remote pull preparation, and controlled access operations. This configuration allows technicians to rapidly conduct investigative tasks and preliminary render-safe preparation without requiring a larger equipment cache.

The kit is housed in an EOD Gear **Berry Compliant rip-away pouch** designed for rapid deployment and modular organization of tools. The pouch features a **MOLLE attachment panel** allowing secure mounting to tactical gear while enabling quick removal during operations.

All kits are assembled by EOD Gear under an **ISO 9001:2015–certified Quality Management System** to ensure consistent configuration and operational reliability. The Master First Line EOD Tool Kit is available for procurement through the **EOD Gear GSA Schedule**.

Kits are supplied in durable tactical pack configurations suitable for operational deployment. Configuration modifications and agency-specific kit configurations are available upon request.

Areas of Expertise

- ✓ Custom Tactical Gear Kitting
- ✓ Build Your Own Kits
- ✓ Metal CNC Fabrication
- ✓ IED IWMD Fabrication
- ✓ Inert Explosives Fabrication
- ✓ Custom Plastics Fabrication
- ✓ Pouch Design and Fabrication
