

EQUIPPING WARRIORS IN HARM'S WAY

2nd Line EOD Tool Kit

The EOD Gear 2nd Line EOD Tool Kit is designed to support explosive ordnance disposal (EOD) technicians, bomb squads, and tactical operators conducting investigative and render-safe procedures involving suspected explosive hazards. The kit expands the capabilities of a technician's first line tool set by providing additional tools and modular sub-kits required for device diagnostics, controlled access operations, and remote manipulation tasks.

The 2nd Line configuration integrates several mission-specific tool sets into a single organized system, allowing technicians to rapidly deploy the tools required for investigative actions, remote pull preparation, and manual access procedures during explosive hazard response operations.

The kit is organized in durable tactical pack configurations that allow modular storage and rapid deployment of individual sub-kits depending on operational requirements. This configuration allows operators to transition quickly between investigative tasks and render-safe preparation procedures during EOD response operations.

All kits are assembled by EOD Gear under an **ISO 9001:2015-certified Quality Management System** to ensure consistent configuration and operational reliability. The 2nd Line EOD Tool Kit is available for procurement through the **EOD Gear GSA Schedule, Purchase Order or P-Card**.

Configuration modifications and agency-specific kit configurations are available upon request.

Areas of Expertise

- ✓ Custom Tactical Gear Kitting
- ✓ Build Your Own Kits
- ✓ Metal CNC Fabrication
- ✓ IED IWMD Fabrication
- ✓ Inert Explosives Fabrication
- ✓ Custom Plastics Fabrication
