

# EQUIPPING WARRIORS IN HARM'S WAY

## 1st Line EOD Tool Kit

The EOD Gear 1st Line EOD Kit is designed to support explosive ordnance disposal (EOD) technicians, bomb squads, and tactical operators conducting initial investigative and access operations involving suspected explosive hazards.

The kit provides operators with the essential tools required to inspect, probe, manipulate, and access suspicious packages, containers, or devices encountered during explosive hazard response operations.

This compact tool kit contains over twenty essential tools used during suspicious package investigations, device inspection, and preliminary render-safe preparation tasks. The configuration allows technicians to perform investigative actions and limited remote manipulation operations while maintaining a lightweight and rapidly deployable equipment system.

The kit is available with two pouch configurations. The standard configuration includes an imported MOLLE pouch providing basic organization and mounting capability. An upgraded configuration includes the **EOD Gear Berry Compliant Rip-Away Pouch**, manufactured in the United States and designed for operational use. The rip-away pouch features a MOLLE attachment panel and an internal Velcro spine allowing modular organization and rapid access to tools during EOD operations.

All kits are assembled by EOD Gear under an **ISO 9001:2015-certified Quality Management System** to ensure consistent configuration and operational reliability. The 1st Line EOD Kit is available for procurement through the **EOD Gear GSA Schedule**. Configuration modifications and agency-specific kit configurations are available upon request.
