

EQUIPPING WARRIORS IN HARM'S WAY

EOD Go Bag

The EOD Gear EOD Go Bag is designed to support explosive ordnance disposal (EOD) technicians, bomb squads, and tactical response teams conducting explosive hazard investigations in dynamic operational environments.

The system provides operators with a rapidly deployable set of tools required for reconnaissance, device inspection, manual access operations, and remote manipulation tasks encountered during suspicious package and IED response operations.

The Go Bag expands upon the Master 1st Line EOD Tool Kit by integrating additional tools and sub-kits that support remote pull operations, device diagnostics, firing system deployment, and investigative procedures. This configuration allows technicians to deploy with a broad range of operational capabilities when responding to unknown or evolving explosive hazards.

The system is organized in a durable tactical backpack with internal MOLLE panels that allow modular organization of tools and rapid access during operations. This modular layout enables operators to quickly transition between investigative tasks, remote handling operations, and render-safe preparation procedures while maintaining an organized and portable equipment system.

All kits are assembled by EOD Gear under an **ISO 9001:2015-certified Quality Management System** to ensure consistent configuration and operational reliability. The EOD Go Bag is available for procurement through the **EOD Gear GSA Schedule**. Configuration modifications and agency-specific kit configurations are available upon request.
