TEST MY AIR™ Testing System

Tests for Mold, Chemicals, & over 500 Toxins & Contaminants for the Entire Home

- Our Air Testing analyzes over **500 toxins and contaminants** including those that are especially harmful to mold sensitive and chemical sensitive people.
- Analysis performed by State certified, Nationally Accredited independent laboratories.
- Tests for hundreds of VOC Chemicals and Ultrafine contaminants that you can NOT see but are **THE MOST DANGEROUS TO YOUR HEALTH.**
- Detects Mold Spores, Mold Chemicals and identifies if the mold is actively growing even if you can't see it.
- **TEST MY AIR™** makes it easy....No in-home appointments necessary, everything is included in the system. The analysis, reports and **FREE shipping** to you and back to our laboratory. **Never any Surprises.**

THE TEST MY AIR™ Testing System

Identifies Over 500 Contaminants & Toxins in the Air within your ENTIRE HOME

Tests for:

- Mold Spores and Mold Chemicals
- Detects if Mold may be actively growing
- VOC Chemicals
- Radioactive Radon
- Ultrafine Particulates
- Carbon Dioxide
- Samples Air and Surfaces
- Toxin Exposure from contaminants that you can NOT see
- Identifies the effectiveness of your current air filter system

FREE 30-Day Access to the *Test My Air™* online weekly "Ask The Expert" program.

Get your questions answered regarding your report results and the steps you plan to take if corrective action is needed.

The Pure Air Doctor System™

Samples Your Entire Home.

- Professional analysis by Independent 3rd Party EPA and State Certified Laboratories.
- 48-hour DNA-based Whole House MOLD Testing detecting Mold in the Air and Mold on Surfaces.
- Detects Active Growing Mold...even hidden in your walls.
- Medical Grade ERMI and HERTSMI-2 Mold Surface AND Airborne Testing.
- Identifies why a low mold spore level can still be a mold problem.
- Complete Identification of 500+ chemicals and VOC's found, and the sources creating them.
- Identifies what chemicals specifically are from paint, carpeting, furniture, and cleaning products.
- Analyzes chemical exposure from building and construction materials.
- Tests contaminant exposure from recent renovations, or remodeling projects.
- Identifies toxins especially harmful to babies, elderly, or those with compromised immune systems.
- Identifies contaminants that create toxic impact to your pets.
- Confirms the effectiveness of recent, or past Remediation Projects.

- Determines what contaminants are being introduced into the home from outside sources.
- Tests for Radioactive Radon Exposure – The #1 Cause of Lung Cancer in non-smokers.
- Carbon Dioxide Test – A strong indicator of a home poorly ventilated and low oxygen level.
- Tests for Dangerous Ultrafine Particulates in every room.
- Temperature & Humidity - All rooms sampled. High humidity increases more mold potential.
- Identifies contaminants created by people and pet activity, versus home based contaminants.
- Identifies potential EMF exposure outside the home from Cellular, Microwave and Communication towers within a 3 mile radius.
- Identifies contaminants and harmful conditions due to inadequate performance of your homes furnace and air conditioning system(s).
- Determines the effectiveness of current filtration or purification systems.
- Comprehensive, yet easy-to-understand written reports.
- Video overview identifying problems found and solutions for corrective options.
- 30-day access to the TEST MY AIR™ "Ask the Expert" weekly online consulting program.

More than Just a Test.
